**Go Spy the Land** Keith Neilson, B.J.C. Mckercher, 1992-10-23 For too long military history has ignored the role of intelligence As a result many people do not realize that military intelligence has played a significant role in history However intelligence gathering evaluation and analysis has always been part of war Lack of knowledge of how intelligence has been utilized in wars makes for an incomplete and inaccurate picture of historical events While many are aware of such things as the Allied code breaking efforts in World War II few know that similar activities were undertaken as early as the beginning of recorded history By examining a number of case studies from Roman times to the present *Go Spy the Land* reveals the essential continuity in military intelligence the fact that many of the problems involved in military intelligence have remained constant and the nature of the problems themselves According to the authors military intelligence has always been an important aspect of military planning and campaigns Furthermore military intelligence in its essentials has not changed over time while technology and society have affected the ways in which this essential activity has been carried out the problems inherent in the task have remained constant The latter conclusion is something not generally appreciated in the intelligence field which has been dominated by historians studying the twentieth century This collection not only provides important case studies but also shows that much of what is claimed as exclusively a product of the twentieth century has its roots as far back in time as the Roman Empire

Intelligence in the American Civil War Thomas Allen, 2010 Though much has been written about the American Civil War itself little has been written about the spy war that went on within The chronicling of Civil War intelligence activities challenges historians because of the lack of records the lack of access to records and the questionable truth of other records Judah P Benjamin the Confederacy s Secretary of State burned all the intelligence records he could find as federal troops entered Richmond Union intelligence records were kept sealed in the National Archives until 1953 A few individuals involved in intelligence gathering burned their personal papers while others chose to publish their memoirs though greatly embellishing their exploits Even today the identities of many spies remain secret Henry Thomas Harrison for example was a Confederate spy whose intelligence set in motion the events that produced the battle of Gettysburg But neither his first name nor details of his long career as a spy were known until 1986 when historian James O Hall published an article about him Though the idea of centralised intelligence gathering was decades away the age old resistance to the idea was present even then Neither side saw the need to create such intelligence organisations but each side approached the idea of effectively acquiring intelligence in their own way The Confederacy s Signal Corps devoted primarily to communications and intercepts included a covert agency the Secret Service Bureau This unit ran espionage and counter espionage operations in the North Late in the war the bureau set up a secret headquarters in Canada and sent out operatives on covert missions in Northern states The Union s Bureau of

Military Information unlike the Confederacy's Secret Service Bureau operated for specific generals rather than for the Union Army itself. But here was born the idea of what would eventually become a centralised military intelligence division. Each side still used age old intelligence techniques such as code breaking, deception and covert surveillance. However into this modern war came two innovations that would endure as tools of espionage: wiretapping and overhead reconnaissance. What follows is a look at some of the highlights of how the North and the South gathered and used their information for the important missions and the personalities. From this special view the focus is not on the battlefield but on a battle of wits.
