Network Project Proposal

In this project, you are the consulting firm that will be creating a proposal to implement networking technology for a business. You will create a fictional or real business that is in need a new network. The project will be built from nothing (no current equipment can be implemented). The business must have at least two locations that are 30 or more miles apart and a minimum of 30 employees. The customer requires a Linux web server, and a Windows Active Directory implementation.

In your executive summary, you will need to explain the business, locations, and the needs assessment.

This is what they want:

1. Web Presence, with web sales
2. Internet access for general areas
3. Intranet
   a. Access between sites
   b. Owner access from home
4. E-mail
5. Wireless access at all sites
6. **For a Retail business:** Implementation of on-line inventory tracking system that will automatically update inventory quantities from cash register sales. Inventory at any location is accessible by the other location. All bookkeeping and payroll is completed in-house. Customers need online access to order and check status of orders.   Or
   For a Manufacturing business: Online manufacturing raw material inventory, production cycle and
   order status system. All Bookkeeping and payroll is completed in-house. Salespeople travel within the US. Customers need online access to order and check status of orders.   Or
   For a Restaurant: Order processing software with inventory system. All bookkeeping and payroll is completed in-house.   Or
   For a Shipping company: Package tracking system, remote update. All bookkeeping and payroll is completed in-house.   Employees travel within the US. Customers need online access to schedule pickup and check status of items.   Or
   Specific needs of the company — contact me if you choose a different sort of business.

NOTE: The above items **must be** addressed, even if you recommend they NOT be implemented — explain your reasoning.

The minimum proposal will include:

➤ Table of Contents
➤ Executive Summary: A concise statement of the project, benefit, and scope geared for the non-technical person to read and understand. Where the company currently is, where they want to be and what benefits the company can expect should they choose to invest in technology and accept your proposal.
➤ Detailed analysis of Business, Technical, and Security requirements. Depending on the type of business you are providing services to, you will need to consider different designs to compliment and assist the business to be efficient and provide a payoff for the technology they implement.
