## **Gastric Cytoprotection:**

**Gastric Cytoprotection** Daniel Hollander, Andrzej S. Tarnawski, 2012-12-06 Gastric secretions contain hydrogen ions at a concentration that is more than one million times higher than their intracellular concentration. This phenomenal gradient as well as the demonstrated ability of gastric juice to digest tissues has motivated clinicians and investigators alike to emphasize acid secretion and acid ablation in studying the pathogenesis and therapy of peptic ulcer disease. Consequently over the past 150 years we have made considerable progress in understanding the mechanisms and regulation of acid secretion by the stomach. Not surprisingly therapy for both peptic disease and mucosal injury has also been predominantly directed at either neutralizing acid or suppressing its production. During the past 10 years attention has been focused on factors other than acid in the genesis and therapy of ulcer disease. Work done worldwide demonstrated that acid hypersecretion is not a common event in peptic ulcer disease. Therefore we began realizing that factors other than acid secretion may be important in the genesis of ulcer disease or in gastroduodenal mucosal damage. In addition new physiological information has established that the gastroduodenal mucosa is normally protected by a complex series of events including mucus and bicarbonate secretion, cell renewal, surface mucosal restitution and preservation of the microvasculature and mucosal proliferative zone.

**Biochemical Pharmacology as an Approach to Gastrointestinal Disorders** Timothy S. Gagginella, K. D. Rainsford, Gyula Mózsik, 2012-12-06 The Gastrointestinal Section of the International Union of Pharmacology (IUPHAR) was established in 1994 in Montreal, Canada. The establishment of the GI Section recognizes the international progress of gastrointestinal pharmacology including basic and human studies. The Gastrointestinal Section of IUPHAR organized the first symposium, **Biochemical Pharmacology as an Approach to Gastrointestinal Diseases from Basic Science to Clinical Perspectives**, on 10-12 October 1995 in Pécs, Hungary. The main topics were: Gastrointestinal secretory and excretory functions; Gastrointestinal motility; Biochemical pharmacological mechanisms in neural and hormonal actions involved in GI functions; Main normal and pathological biochemical mechanisms in GI functions; GI mucosal injury and protection; Molecular mechanisms of premalignant and malignant diseases in GI tract; Use of isolated cells and cell cultures in biochemical pharmacological studies to approach GI diseases. The presented papers are published in this book.

**Mechanisms and Consequences of Proton Transport** Tetsuro Urushidani, John G. Forte, George Sachs, 2012-12-06 This volume represents the proceedings of the 9th International Proton Transport Conference, **Mechanisms and Consequences of Proton Transport**, held in Leura, Australia, August 19-21, 2001. This conference has been held since 1971 every 3 to 4 years with few exceptions in association with the Congress of the International Union of Physiological Sciences. The first meeting was held in Frankfurt, Germany, at the Max Planck Institute. Countries hosting the conference have been Germany twice, Sweden twice, India, Canada, USA, Great Britain, and now Australia.

Over the past 30 years participants at these Proton Transport Conferences have been principal contributors to the major discoveries in the physiology biochemistry and pharmacology of gastric acid secretion These include development of the H<sub>2</sub> receptor blockers defining the signaling pathways for the regulation of acid secretion identifying the gastric proton pump discovery and development of proton pump inhibitory drugs and elucidating the physiology and biochemistry of Helicobacter pylori
