**Learning across Contexts in the Knowledge Society** Ola Erstad, Kristiina Kumpulainen, Åsa Mäkitalo, Kim Christian Schrøder, Pille Pruulmann-Vengerfeldt, Thuridur Jóhannsdóttir, 2016-02-10 Developments within the knowledge society especially those resulting from technological innovation have intensified an interest in the relationship between different contexts and multiple sites of learning across what is often termed as formal non formal and informal learning environments The aim of this book is to trace learning and experience across multiple sites and contexts as a means to generate new knowledge about the borders and edges of different practices and the boundary crossings these entail in the learning lives of young people in times of dynamic societal environmental economic and technological change The empirical research discussed in this book has grown out of a Nordic network of researchers The research initiatives in the Nordic countries tend to avoid the more spectacular debates over the future of the educational institutions that tend to dominate and obscure discussions on education in the knowledge society and which look to models of informal learning whether in the learning communities of workplaces and families or in the new socio technical spaces of the Internet as a source of alternative educational strategies Rather Nordic researchers more modestly ask whether it is possible to envisage new models of teaching and learning which take seriously both the responsibility to social justice and social wellbeing which at least rhetorically underpinned a commitment to mass education of the 20th century as well as to the radical challenges to traditional educational models offered by the new socio technical spaces and practices of the 21st century
