Emotions And Memory

David Rapaport

Emotions And Memory:

Memory and Emotion Bob Uttil, Nobuo Ohta, Amy Siegenthaler, 2008-04-15 *Memory and Emotion Interdisciplinary Perspectives* is a collection of original articles that explores cutting edge research in memory and emotion discussing findings methodological techniques and theoretical advances in one of the fastest growing areas in psychology contains contributions by leading researchers the field emphasizes cognitive neuroscience psychopathology and aging in covering contemporary advances in research on memory and emotion covers many of the current hot topics in the field including dissociative amnesia and post traumatic stress disorder false recovered and traumatic memories flashbulb memories the use of emotional memories in therapy and the influence of emotion on autobiographical memory

Memory and Emotion

James L. McGaugh, 2003 Memories come in many different forms and vary substantially in strength some such as where you put your car keys can be brief while others remain in the mind forever James McGaugh a leading neurobiologist provides an accessible and thought provoking look at how we remember and why we forget Beginning with the first scientific studies of learning and ending with the latest cutting edge research he explores how memories are made and preserved why some experiences fade and disappear with time how stress hormones effect the consolidation of memory whether drugs would improve our ability to learn and what studies of extraordinary memories and disorders tell us about the workings of the brain systems involved in memory formation

The Handbook of Emotion and Memory Sven-Åke Christianson, 1992 First Published in 1992 Routledge is an imprint of Taylor Francis an informa company

Emotional Memory Across the Adult Lifespan Elizabeth A. Kensinger, 2008-12-15 Though many factors can influence the likelihood that we remember a past experience one critical determinant is whether the experience caused us to have an emotional response Emotional experiences are more likely to be remembered than nonemotional ones and over the past couple of decades there has been an increased interest in understanding how emotion conveys this memory benefit This book begins with a broad overview of emotion memory and the neural underpinnings of each providing the reader with an appreciation of the complex interplay between emotion and memory It then examines how emotion influences young adults abilities to store information temporarily or over the long term It explains emotion s influence on the memory processes that young adults use consciously and on the processes that guide young adults preferences and actions without their awareness This book then moves on to describe how each of these influences of emotion are affected by the aging process and by age related disease providing the reader with a lifespan perspective of emotional memory Within each of the domains covered the book integrates research from cognitive psychology cognitive neuroscience and neuropsychological perspectives examining both the behavioral and thought processes that lead to emotion s effects on memory and also the underlying brain processes that guide those influences of emotion This book will be of interest to researchers and graduate students in memory emotion and aging working in the fields of cognitive psychology cognitive or affective neuroscience and developmental or lifespan psychology

Emotion in Memory and Development Jodi Quas, Robyn Fivush, 2009-04-09 The question of how well children recall and can discuss emotional experiences is one with numerous theoretical and applied implications Theoretically the role of emotions generally and emotional distress specifically in children's emerging cognitive abilities has implications for understanding how children attend to and process information how children react to emotional information and how that information affects their development and functioning over time Practically speaking increasing numbers of children have been involved in legal settings as victims or witnesses to violence highlighting the need to determine the extent to which children's eyewitness reports of traumatic experiences are accurate and complete In clinical contexts the ability to narrate emotional events is emerging as a significant predictor of psychological outcomes How children learn to describe emotional experiences and the extent to which they can do so coherently thus has important implications for clinical interventions

Remembered Self Jefferson A. Singer, Peter Salovey, 2010-06-15 A theory for psychologists on the role of memory in personality psychology In *The Remembered Self* Jefferson A. Singer and Peter Salovey persuasively argue that memories are an important window into one's life story revealing characteristic moods motives and thinking patterns Through experimental evidence clinical case material and examples from literature the authors offer a fresh perspective on the role of memory in personality and clinical psychology Unlike the conventional psychoanalytic approach to memory which concentrates on what is forgotten Singer and Salovey treat memory in a new and different way with an emphasis on what is remembered Theirs is a bold new theory of memory and self that is both comprehensive and accessible

Memory and Emotion Bob Uttl, Nobuo Ohta, Amy Siegenthaler, 2006-08-18 *Memory and Emotion Interdisciplinary Perspectives* is a collection of original articles that explores cutting edge research in memory and emotion discussing findings methodological techniques and theoretical advances in one of the fastest growing areas in psychology contains contributions by leading researchers the field emphasizes cognitive neuroscience psychopathology and aging in covering contemporary advances in research on memory and emotion covers many of the current hot topics in the field including dissociative amnesia and post traumatic stress disorder false recovered and traumatic memories flashbulb memories the use of emotional memories in therapy and the influence of emotion on autobiographical memory

Memory and Emotion Daniel Reisberg, Paula Hertel, 2003-12-04 Understanding the interplay between memory and emotion is crucial for the work of researchers in many arenas clinicians psychologists interested in eyewitness testimony psychobiologists to name just a few *Memory and Emotion* spans all these areas and brings them together into one volume Daniel Reisberg and Paula Hertel have assembled contributions from the most visible and productive researchers working at the intersection of emotion and memory The result is a sophisticated profile of our current understanding of how memory is shaped both by emotion and emotional disorder The diverse list of topics includes the biology of traumatic memory the memory disorders produced by depression anxiety and schizophrenia the nature of emotional memory both in children and the elderly and the collective memory processes at work in remembering

the Holocaust This unified collection of cutting edge research will be an invaluable guide to scholars and students in many different research areas *Emotional Memory Failures* Ineke Wessel, Daniel B. Wright, 2004 The beginning of the 1990 s saw a partisan debate about the nature of recovered memories for highly emotional events Some authors claimed that recovered memories of trauma always referred to veridical memories that had been inaccessible for years Others argued that such memories were false by definition and that they were created by therapeutic attempts to uncover trauma that was believed to lie at the root of anxiety or depression Although the debate soon moved to a middle ground both sides fuelled the development of relevant experimental paradigms to explore the mechanisms for how false memories might be created and also how true memories might be forgotten Examples are studies looking at memory implanting false word memory and retrieval induced forgetting in the mid 1990 s Many studies using such paradigms however relied on emotionally neutral material Studies relating to trauma were less readily available Now more and more researchers are bridging this gap testing whether emotive material can be implanted and forgotten and whether there are special populations more susceptible to these effects This special issue brings together papers examining emotion and memory malleability both providing a picture of the state of the art research and pushing the field forward *The Psychology of the Emotions* Théodule Ribot, 1914

Cannabinoid Modulation of Emotion, Memory, and Motivation Patrizia Campolongo, Liana Fattore, 2015-05-18 The endocannabinoid system consists of cannabinoid receptors their endogenous lipid ligands endocannabinoids and the enzymatic machinery for their synthesis and degradation In the brain endocannabinoids regulate ion channel activity and neurotransmitter release and thereby contribute to various aspects of brain function including memory reward and emotions Their ability to modulate synaptic efficacy has a wide range of functional consequences and provides unique therapeutic possibilities Unprecedented advances have been made in the understanding of the role of endocannabinoids in the regulation of the emotional brain over the past few years However a comprehensive book encompassing all these aspects is still lacking The book will provide an overview of the role played by the endocannabinoid system in the regulation of emotional processes with particular emphasis on the modulation of memory and reward for emotionally arousing events and for the regulation of motivational aspects in cannabis use *Feeling Memory* Lindsey Dodd, 2023-07-04 What did it feel like to be a child in France during World War II *Feeling Memory* is an affective exploration of children s lives in wartime France and the ways they are remembered Lindsey Dodd draws on the recorded oral narratives of a hundred people to examine the variety of experiences children had during the war She considers different aspects of remembering underscoring the centrality of emotion to memory This book covers a wide range of locations the country and the city Occupied France and the Free Zone and situations well off and poor children those separated from their families and those with them it places Jewish children s experiences alongside non Jewish children s Against the backdrop of momentous events readers encounter children playing working eating thinking doing and feeling An investigation of the emotions of history *Feeling Memory* argues for the

transformative potential of affect theory and affective methodologies in oral history and the history of everyday life This book makes major contributions to the history of France during World War II understandings of children s lives in war and the use of memory in historical and oral history analysis *How Does Emotion Affect Attention and Memory?* Katherine Mickley Steinmetz, Elizabeth A. Kensinger, 2010 Out of all of the information that we experience only a subset will become part of our memories Attentional processes engaged during an event s unfolding are essential for allowing us to transform an experience into a memory and emotion can critically modulate those attentional processes increasing the likelihood that an emotional experience becomes part of our memory stores This book reviews behavioural and neuroimaging evidence that has revealed effects of emotion on memory and attention in individuals with and without posttraumatic stress disorder PTSD

Emotions and Memory David Rapaport, 1961 **The Handbook of Emotion and Memory** Sven-Åke Christianson, 1992 The Psychology of Emotion K. T. Strongman, 1987-08-10 Offers a full representation of research in the psychology of emotion with complete coverage of all aspects of the subject including such unconventional aspects as phenomenology This new edition emphasizes the cognitive approach and also includes more speculative material on a variety of topics such as emotion and the natural environment and emotion and the arts Also added is a concluding statement of the author s own views References have been reduced for easier readability The Pedagogical Seminary , 1901 Vols 5 15 include Bibliography of child study by Louis N Wilson **Introduction to Juristic Psychology** Prabodh Chandra Bose, 1917

Emotion Morten Kringelbach, Helen Phillips, 2014-03 Emotion provides a clear contemporary review of our understanding of emotions and their neural basis what is happening in our brains to make us feel the way we do It also explores emotional disorders and how our understanding of emotion can be used to treat a range of psychiatric disorders

Psychological Review James Mark Baldwin, James McKeen Cattell, Howard Crosby Warren, John Broadus Watson, Herbert Sidney Langfeld, Carroll Cornelius Pratt, Theodore Mead Newcomb, 1901 Issues for 1894 1903 include the section Psychological literature
