Materials on Left Dislocation Elena Anagnostopoulou, Henk van Riemsdijk, Frans Zwarts, 1997-02-13 Materials on Left Dislocation consists of two parts Part I contains a selection of the main texts on which our present understanding of the Left Dislocation construction is based For various reasons most of these texts had never been published or are published in obsolete places These articles by Van Riemsdijk Zwarts Rodman Hirschbuehler Vat Cinque and Zaenen contain the first arguments that pertain to the major questions about Left Dislocation for example whether movement or base generation is involved and they present the rationale for the now standard distinctions between Hanging Topic LD Contrastive LD and Clitic LD In Part II a number of recent contributions to the grammar of Left Dislocation are brought together In these articles by Anagnostopoulou Demirdache Escobar Van Hoof and Wiltschko new aspects are being explored such as the relationship between LD and the grammar of focus and the role of clitic doubling and its semantic effects in Clitic LD Furthermore the empirical basis is broadened to encompass more languages Finally these articles explore the relationship between LD and a number of apparently unrelated constructions such as split topicalization The book constitutes an indispensable tool for any linguist who seriously works on dislocation phenomena

The Structure of Learner Varieties Henriëtte Hendriks, 2011-12-22 This volume brings together ten contributions to the study of untutored mainly second but also first language acquisition All chapters have been written from a functionalist perspective and take as the main theoretical framework a model of spontaneous second language acquisition centered on the basic variety as proposed by Klein and Perdue The chapters in the volume are grouped around two research themes The first theme concerns the acquisition of scope phenomena negation scope particles the second one deals with referential movement reference to person time and space Both parts provide insights in the structure of learner varieties at various stages of development and are followed by a discussion chapter Scope phenomena such as negation and frequency adverbials present an important learning problem as learners have to reconcile the logical structure of their utterances with the syntactic specifics of the language being learned Their acquisition has been relatively neglected in studies up to date however and we even lack detailed knowledge about the interpretation of scope particles in the target languages The chapters in this part of the volume set out to provide more knowledge about scope phenomena in general more detailed descriptions of the particles in the languages under consideration and a more general understanding of how scope is acquired Strong findings resulting from the ESF project suggested universal trends in how untutored learners deal with acquisition in the very early stages the basic variety Chapters in this second part of the volume on referential movement look at acquisition at more advanced stages

including the production of near native speakers Learners who progress beyond the basic variety increasingly grammaticalise their productions This later development is supposedly more variable as more specific aspects of the target languages are now being acquired Chapters in this part allow to shed more light on the question regarding universal and language specific influences on language acquisition

Spanish Sentences Vol.1 Nik Marcel, Robert P. Stockwell, J. Donald Bowen, Ismael Silva-Fuenzalida, SPANISH SENTENCES Vol 1 English Spanish THIS EDITION The dual language text has been arranged into sentences for quick and easy cross referencing The text can be used on its own However the content is ideal for reinforcing grammar and as a precursor to more advanced bilingual editions This digital edition contains the content in English to Spanish and Spanish to English formats Once a student has studied the basics a suitable book about basic grammar is helpful The suggestion is that it be studied more with the intent of recognition and understanding rather than memorising and obsessive rote learning Go through as much of the book you feel you can digest maybe even the whole book skipping over what is not easily understood Then read through a portion of text in this book looking for examples of what you have picked up or gleaned in your hopefully not so arduous study of grammar Even repeatedly seeing a word that you remember seeing listed as a subject pronoun or a third person plural verb of some sort is a great help Then depending on your inclination return to the grammar book or your basic Spanish book or move on to lengthier bilingual text like in 2Language Books texts containing news or stories for example or find some suitable Spanish text a simple novel a Spanish news website etc Grammar books will likely have some verb charts However there are currently good on line resources that go further dictionaries with a verb conjugation search option Many basic language books offer some form of audio support Internet services primarily news based radio stations offer podcasts Audio from television is an additional resource and can be formatted for use on various digital platforms However if audio is an important component of your interest in languages electronic devices that support quality text to speech TTS will likely be appealing With a library card TTS technology in a device that supports the relevant content and the above mentioned resources an entire language learning system is available for not much more than a cup of coffee There is no substantial financial outlay to get you started Furthermore there are no additional ongoing fees and updates and there are no expiry dates on premium content and resources
