### Scientific Inquiry Cycle: Review

Science helps us understand and solve problems by applying knowledge and creating things that help us live better. Each step in the cycle is important. Using science to solve a problem or improve solutions can have a positive impact. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.

Designing solutions requires considering various conditions, such as budget, time, and safety concerns. Sometimes, important parts of a solution might be challenging, so it's important to weigh these trade-offs carefully. For example, creating materials for a house that are affordable to build and easy to use, versus influencing the effectiveness of the solution.

After identifying a solution, documenting how it works, what conditions affected it, and any compromises that have already been made are always involved in the cycle. Communication, using digital media, and reflecting on the results of the solution are important steps. This process helps you identify areas that need further improvement, feedback, testing, and data collection.

#### 6A. Mark the best answer for each question.

1. What is the first important step when working on a local problem?
- Thinking of a solution
  - Using the most expensive materials
  - Ignoring safety concerns
  - Understanding the problem fully
2. What does documenting a solution help with?
- Ignoring the conditions of the solution
  - Building a solution that is safe and reliable
  - Showing how to solve the problem
  - Demonstrating that the solution has no risks
3. Which is an example of a trade-off?
- Finding a solution with no risks
  - Using materials that are safe and reliable
  - The time it takes to build the solution
  - Using unsafe materials
4. Why is communication important in the scientific process?
- To avoid any risks in the solution
  - To make sure others understand the problem
  - To share the problem and solution with others
  - To avoid sharing information

#### 6B. Mark if the statement is True (T) or False (F).

1. A hypothesis is a statement that can be tested.

2. A hypothesis is a statement that is always true.

3. A hypothesis is a statement that is always false.

4. A hypothesis is a statement that is always correct.

5. A hypothesis is a statement that is always wrong.
