SCIENCE FOCUS: RELATING SCIENCE TO THE SOCIETY.

COMES OFF ON

RADIO WINDY BAY, 98.3FM ON EVERY THURSDAY 9: 30PM – 10: 00PM

TOPIC: BODY IMAGE AND EATING DISODERS

1.How would you define body image and why is it important to have a healthy body image?

Answer

Body image refers to a person's perception and feelings about their own body. It encompasses how we see ourselves, our thoughts about our appearance, and the emotions associated with it. Having a healthy body image is crucial because it impacts our self-esteem, mental well-being, and overall quality of life. When we have a positive body image, we accept and appreciate our bodies for their unique qualities, rather than focusing on unrealistic ideals or comparing ourselves to others.

2. Eating disorders can have a devastating impact on individuals and their loved ones. Can you provide us with an overview of the different types of eating disorders and their potential consequences?

Answer.

- Certainly. Eating disorders are complex mental health conditions characterized by disturbed eating behaviors and a preoccupation with weight, shape, and food. The most common types include:

Focus On Relating:

Focus-related Operations at the Right Edge in Spanish Iván Ortega-Santos, 2016-05-11 Syntactic movement is a pervasive phenomenon in natural language and as such has played a key role in syntactic theorizing. Nonetheless, an understanding of the mechanism that allows a constituent to appear to the right of its base-generated position has remained elusive. This groundbreaking research monograph aims to address this gap in our knowledge by expanding the inventory of languages and data sets traditionally considered in the literature. Specifically, Ortega Santos analyzes the interplay between focus word order and ellipsis in Spanish. A major finding that emerges from the analysis is that the tension between linearization requirements and rightward movement is diminished by ellipsis. Current debates on the syntax of the VOS order and preverbal subjects in Null Subject Languages also figure prominently in the discussion as novel empirical evidence for the existence of null expletives is provided. A non-trivial issue for our understanding of the Extended Projection Principle and subjecthood across languages.

The Syntax of Information-Structural Agreement Johannes Mursell, 2021-09-15 In this research monograph, Johannes Mursell discusses the syntactic impact of information structural features on agreement. So far, the syntactic contribution of this type of feature has mostly been reduced to movement of topics or foci clause initial position. Here, the author looks at a different phenomenon: syntactic agreement and how this process can be dependent on information structural properties. Based partly on original fieldwork from a typologically diverse set of languages including Tagalog, Swahili, and Lavukaleve, it is argued that for most areas for which information structural features have been discussed, it is possible to find cases where these features influence phi feature agreement. The analysis is then extended to cases of Association with Focus, which does not involve phi features but can still be accounted for with agreement of information structural features. The book achieves two main goals: first, it provides a uniform analysis for different constructions in unrelated languages; second, it also gives a new argument that information structural features should be treated as genuine syntactic features.
