The newly updated **Electronic Fetal Monitoring Concepts and Applications 3rd Edition** is an invaluable guide for clinicians, nurses, nurse midwives, and physicians responsible for ordering, initiating, performing, and interpreting electronic fetal monitoring (EFM). Written by OB/GYN nurses and advanced practitioners, this combination textbook/workbook offers clinicians involved in perinatal care a uniquely detailed, in-depth, and historical perspective on EFM. Topics include maternal/fetal physiology, EFM instrumentation, antepartum and intrapartum fetal assessment, and pattern interpretation, and a variety of additional issues and challenges relevant to the current state of EFM practice. Applicable to both the novice and seasoned practitioner, this text is useful as both a primer for this specialty field and also as a detailed resource to ready for the NCC Certificate of Added Qualification in EFM. Upgrade and update your EFM skills with Examples of EFM tracings that demonstrate the points presented in the text, including 22 case studies annotated with real-time bedside interpretation followed by expert review with commentary to support these analyses. Validation of knowledge: New End of chapter study questions and answers are a perfect supplement for certification exam preparation. For the educator, methods of competence validation are discussed and presented in detail. Up-to-date EFM guidelines explained and demonstrated in real-life situational context. Concise, easy-to-follow support for optimal acquisition and assessment of EFM data and proper response to findings. Expert advice on handling both clinical and instrumental challenges related to EFM. Detailed explanation of the workings of EFM equipment and technology. Proven algorithms for management of antepartum testing and of EFM data, outlining specific interventions and their rationales. Coverage of crucial knowledge including maternal/fetal physiology, fetal heart rate patterns, and management of unusual EFM tracings, common problems, and more. Chapter features include helpful tips, Stork Bytes to highlight important points. Your book purchase includes a complimentary download of the enhanced eBook for iOS™, Android™, PC, and Mac. Westwood, 2008 We humans are tribal

grouping ourselves by a multitude of criteria physical intellectual political emotional etc The Internet and its auxiliary technologies have enabled a novel dimension in tribal behavior during our recent past This growing connectivity begs the question will individuals and their communities come together to solve some very urgent global problems At MMVR we explore ways to harness information technology to solve healthcare problems and in the industrialized nations we are making progress In the developing world however things are more challenging Massive urban poverty fuels violence and misery Will global networking bring a convergence of individual and tribal problem solving Recently a barrel shaped water carrier that rolls along the ground was presented improving daily life for many people Also the One Laptop per Child project is a good example of how the industrialized nations can help the developing countries They produce durable and simple laptops which are inexpensive to produce At MMVR we focus on cutting edge medical technology which is generally pretty expensive While the benefits of innovation trickle downward from the privileged few to the broader masses we should expand this trickle into a flood Can breakthrough applications in stimulation visualization robotics and informatics engender tools as ingeniously as the water carrier or laptop With some extra creativity we can design better healthcare for the developing world too
