

HOW TO READ A SAFETY DATA SHEET

OSHA Brief

The Hazard Communication Standard (HCS) (29 CFR 1910.1201, revised in 2012), requires that the chemical manufacturer, distributor, or importer provide Safety Data Sheets (SDS) (formerly MSDs or Material Safety Data Sheets) for each hazardous chemical to be stored in any workplace. These sheets provide information to help workers understand chemicals by becoming familiar with the format and understand the contents of the SDS.

The SDS includes information such as the properties of each chemical, the physical, health, and environmental health hazards, protective measures, and safety precautions for handling, storage, and disposal of the chemical. This information is contained on the SDS in a standard layout (although it may be in other languages as well). In addition, OSHA requires that SDSs provide specific minimum information as detailed in Appendix C of 29 CFR 1910.1201. The SDS program may also include other related information.

Second Communications Standard Safety Data Sheets Sections 1 through 8 contain general information about the chemical, identification, hazards, composition, safe handling practices, and emergency control measures. This information should be helpful to those that need to get the information quickly. Sections 9 through 11 and 14 contain other technical and scientific information, such as physical and chemical properties, stability and reactivity information, toxicological information, exposure control information, and other information. Sections 12 through 15 contain information on disposal, and Section 16 contains information on other relevant issues when the product is used and related information for any required elements.

The SDS must also contain Sections 13 through 15, to be consistent with the GHS Globally Harmonized System of Classification and Labeling of Chemicals (GHS), but OSHA will not enforce the content of these sections because they concern matters handled by other agencies.

Section 1: Identification

- Recommendations on the conditions for safe storage, including any incompatibilities.
- Provide advice on specific storage requirements (e.g., ventilation requirements).

Section 8: Exposure Controls/Personal Protection

THIS SECTION INDICATES THE EXPOSURE LIMITS, ENGINEERING CONTROLS, AND PERSONAL PROTECTIVE EQUIPMENT THAT CAN BE USED TO MINIMIZE WORKER EXPOSURE.

- OSHA Permissible Exposure Limits (PELs), American Conference of Governmental Industrial Hygienists (ACGIH) Threshold Limit Values (TLVs), and any other exposure limits used or recommended by the chemical manufacturers, importer, or employer preparing the safety data sheet, where available.
- Any other engineering controls (e.g., use local exhaust ventilation, or use any other technical systems).
- Recommendations for personal protective measures to prevent illness or injury from exposure to chemicals, such as eye and face protective equipment (PPE) (e.g., appropriate use of eye, face, and/or respiratory protection, based on hazards and potential exposure).
- Any special requirements for PPE, protective clothing or equipment (e.g., type of glove material, such as nitrile, nitrile-butadiene gloves, or other type of glove).

Section 9: Physical and Chemical Properties

THIS SECTION IDENTIFIES PHYSICAL AND CHEMICAL PROPERTIES ASSOCIATED WITH THE SUBSTANCE OR MIXTURE.

- Appearance (physical state, color, etc.).
