William (Bill) Adams, 2013-06-17 Conservation in the 21st century needs to be different and this book is a good indicator of why Bulletin of British Ecological Society *Against Extinction* tells the history of wildlife conservation from its roots in the 19th century through the foundation of the Society for the Preservation of the Wild Fauna of the Empire in London in 1903 to the huge and diverse international movement of the present day It vividly portrays conservation s legacy of big game hunting the battles for the establishment of national parks the global importance of species conservation and debates over the

sustainable use of and trade in wildlife Bill Adams addresses the big questions and ideas that have driven conservation for the last 100 years How can the diversity of life be maintained as human demands on the Earth expand seemingly without limit How can preservation be reconciled with human rights and the development needs of the poor Is conservation something that can be imposed by a knowledgeable elite or is it something that should emerge naturally from people s free choices These have never been easy questions and they are as important in the 21st century as at any time in the past The author takes us on a lively historical journey in search of the answers      **Future Nature** William Mark Adams,1996 In this book the author offers a fundamental reassessment of conservation He argues that it is no longer a matter of parks and reserves but conservation must now be central to our relationship with nature and embrace the whole countryside

**Urban Environments - History, Biodiversity & Culture** Ian D. Rotherham, 2015 This volume is a retrospective publication of contributions originally to two national conferences seminars held in Sheffield on the theme of Urban Environments History Biodiversity and Culture To the updated papers from those events we have added invited current contributions on the themes of urban nature and urban ecology Ideas and issues in urban ecology become more significant as globalisation urbanisation and cultural severance shape our world and our future ecologies This is paralleled by increasing interest in the underpinning science and research paradigms in relation to urban environmental spaces In the early 2000s ecologists new to the urban context suddenly became excited about the juxtaposition of pollution and biodiversity in degraded and contaminated sites something well known to urban ecologists and naturalists since the 1980s or earlier Similarly the contributions of urban gardens to nature conservation were greeted with surprise and excitement

**Loving Nature** Kay Milton, 2003-09-01 As the full effects of human activity on Earth's life support systems are revealed by science the question of whether we can change fundamentally our relationship with nature becomes increasingly urgent Just as important as an understanding of our environment is an understanding of ourselves of the kinds of beings we are and why we act as we do In *Loving Nature* Kay Milton considers why some people in Western societies grow up to be nature lovers actively concerned about the welfare and future of plants animals ecosystems and nature in general while others seem indifferent or intent on destroying these things Drawing on findings and ideas from anthropology psychology cognitive science and philosophy the author discusses how we come to understand nature as we do and above all how we develop emotional commitments to it Anthropologists in recent years have tended to suggest that our understanding of the world is shaped solely by the culture in which we live Controversially Kay Milton argues that it is shaped by direct experience in which emotion plays an essential role The author argues that the conventional opposition between emotion and rationality in western culture is a myth The effect of this myth has been to support a market economy which systematically destroys nature and to exclude from public decision making the kinds of emotional attachments that support more environmentally sensitive ways of living A better understanding of ourselves as fundamentally emotional beings could give such ways of living the respect they need
