impelling the change were settler borne diseases the negative effects of federal Indian policies and the sincere desire of both Indians and agency doctors and nurses to combat the spread of disease Here we see how unlike many encounters between Indians and non Indians in Southern California this cooperative effort proved positive and constructive resulting in fewer deaths from infectious diseases especially tuberculosis The first study of its kind Trafzer s work fills gaps in Native American medical and Southern California history It informs our understanding of the working relationship between indigenous and Western medical traditions and practices as it continues to develop today *Magill's Medical Guide* Karen E.
