Light Emerging Barbara Ann Brennan,1993-11-01 Barbara Ann Brennan continues her ground breaking exploration of the human energy field or aura the source of our experience of health or illness Drawing on many new developments in her teaching and practice she shows how we can be empowered as both patients and healers to understand and work with our most fundamental healing power the light that emerges from the very center of our humanity In a unique approach that encourages a cooperative effort among healer patient and other health care providers *Light Emerging* explains what the healer perceives visually audibly and kinesthetically and how each of us can participate in every stage of the healing process Presenting a fascinating range of research from a paradigm of healing based on the science of holography to insights into the hara level and the core star *Light Emerging* is at the leading edge of healing practice in our time Problems Facing the Black Elderly United States. Congress. House. Select Committee on Aging,1979 Annual Report ,1900 Perspectives in Ethology P.P.G. Bateson,Peter H. Klopfer,2013-06-29 This volume is subtitled *Alternatives* because we wanted to devote at least a part of it to the alternative ways in which members of the same species behave in a given situation Not so very long ago the supposition among many ethologists was that if one animal behaved in a particular way then all other members of the same age and sex would do the same Any differences in the ethogram between individuals were to be attributed to normal biological variation Such thinking is less common nowadays after the discovery of dramatic differences between members of the same species which are of the same age and sex Alternative modes of behavior though now familiar raise particularly interesting questions about current function evolutionary history and mechanism Do the differences represent equally satisfactory solutions to a given problem Are some of the solutions the best that those animals can do given their body size and general condition Is an alternative solution adopted because so many other individuals have taken the first If so do the frequencies reached at equilibrium depend on differential survival of genetically distinct types or do they result from decisions taken by individual animals If the alternatives are induced during development as are the castes of social insects what is required for such triggering The questions about alternative ways of behaving are addressed in some of the chapters in this volume Sessional Papers - Legislature of the Province of Ontario Ontario.
