Towards Powerful Educational Knowledge Jim Hordern, Johan Muller, Deng Zongyi, 2024-04-11 This book explores what constitutes valid or powerful educational knowledge and the role of educational theorising in questions of educational practice It examines the challenges facing the deliberative educational knowledge traditions of educational foundations curriculum theory and Didaktik as a consequence of the rising tide of empiricism in educational research the what works agenda in global educational reform and internal fragmentation within the traditions themselves By examining the potential for the reconfiguration or reconstruction of these traditions the book explores the possibility of reinvigorating deliberative educational theorising in ways that could provide a meaningful basis for educators to conceptualise their practice and a robust response to policies that seek to narrow educational activity to a focus solely on learning outcomes and technical efficiency This insightful volume will be of interest to all those concerned about the future of education and particular the relationship between educational theory and educational practice in curriculum studies teacher education and professional development It will be a key resource for teachers curriculum developers policy makers and researchers in the field of curriculum theory and didactics The book was originally published as a special issue of Journal of Curriculum Studies

Philosophy of Educational Knowledge W. Brezinka, 2012-10-23 For two reasons we are particularly proud to include Wolfgang Brezinka's Philosophy of Educational Knowledge in this series of books on Philosophy of Education The first is the philosophical interest of the work itself its remarkable scholarship and the importance of the philosophical positions will be obvious to all readers The second is that it brings to the English speaking world a wonderful example of educational philosophy as now being practiced in the German speaking world All too often philosophers in the Anglo American tradition have not seen the sort of perspective on educational thinking that infuses this work And since this book has been widely read in its original version it has had a considerable impact upon philosophy of educational research and science in the German speaking countries An understanding of this may help in the development of even more cooperative relations among students of education in all countries C 1 B Macmillan D C Phillips PREFACE TO THE ENGLISH EDITION I am not unmindful how little can be done in a mere treatise on Logic or how vague and unsatisfactory all precepts of Method must necessarily appear when not practically exemplified in the establishment of a body of doctrine Doubtless the most effectual mode of showing how the sciences maybe constructed would be to construct them JOHN STUART MILL 1843 1 Parents have a duty to educate their children teachers to educate their pupils For this reason there is widespread interest in education Knowledge of education has long been offered under names like pedagogics pedagogy or educational theory Originally this meant practical knowledge based on common sense Since the Enlightenment however attempts have been made to acquire scientific knowledge of education *Educational Review*, 1922 *Educational Tests for Use in Elementary Schools* Charles Watters Odell, University of Illinois (Urbana-Champaign campus).
