International Encyclopedia of Developmental and Instructional Psychology Erik de Corte, Franz E. Weinert, 1996 This Encyclopedia intends to provide a research based overview in an educational perspective of the present state of the art of our knowledge and understanding of the conditions processes and modifiabilities of human development and learning The Encyclopedia focuses on both

developmental psychology and instructional psychology Over the past decade the boundaries between these two separate research domains have become increasingly obscure Indeed developmental psychologists have shown a growing interest in the impact of environmental factors on development this has led to the study of educational and instructional variables the pre dominantly environmental factors Meanwhile instructional psychology has become a major subdomain of research on human cognition and development A substantial contribution to the synergy between both domains derives from the robust research finding that developmental changes are very important conditions as well as consequences of the acquisition of knowledge and meta cognitive strategies The resulting changes have inspired the decision to combine both developmental and instructional psychology into one single volume The trend toward the integration of both domains notwithstanding the systematic discussion of their research findings requires a certain delimitation of the two fields The Encyclopedia is divided into 16 areas in order to reflect the specific nature as well as the integration of both domains In the first section which is most representative of the integrative tendency a general framework of research on human development learning and instruction is outlined The next six chapters are concerned with the various aspects of human development and learning The remaining nine sections represent an overview of the research findings on learning and instruction which are relevant to education Articles include updated and revised material from the International Encyclopedia of Education 2nd Edition described by Choice as being a premier resource when judged on virtually every criteria applied to a reference work The Encyclopedia provides an informative introduction to aspects of developmental psychology and instructional psychology that significantly influence education

is a special field of endeavor since it strives to apply what we know about many different disciplines to the broad process of education. In the most general terms you can expect to find topics in this area that fall into the categories of human learning and development across the life span, motivation, measurement and statistics, and curriculum and teaching. There are few comprehensive overviews of the field of educational psychology, and the purpose of this two-volume Encyclopedia is to share this information in a way that is both informative without being overly technical or intimidating. With more than 275 contributions, the Encyclopedia of Educational Psychology opens up the broad discipline of educational psychology to a wide and general audience. Written by experts in each area, the entries in this far-reaching resource provide an overview and an explanation of the major topics in the field of human development. While the Encyclopedia includes some technical topics related to educational psychology, for the most part it focuses on those topics that evoke the interest of the everyday reader.

Key Features: Addresses topics that are of particular interest to the general public such as vouchers, Head Start, divorce, learning communities, and charter schools. Shares subjects that are rich, diverse, and deserving of closer inspection with an educated reader who may be uninformed about educational psychology. Draws from a variety of disciplines including psychology, anthropology, education, sociology, public health, school psychology, counseling, history, and philosophy. Presents many different topics all tied together by the theme of how the individual can best function in an educational setting, from pre-school through adult education.

Key Themes: Classroom Achievement, Classroom Management, Cognitive Development, Ethnicity, Race and Culture, Families, Gender and Gender Development, Health and Well-Being, Human Development, Intelligence and Intellectual Development, Language Development, Learning and Memory, Organizations, Peers and Peer Influences, Public Policy, Research Methods and Statistics, Social Development, Teaching, Testing, Measurement and Evaluation, Theory. This practical Encyclopedia brings the field of educational psychology to the everyday person, making it a welcome addition to any academic or public library.
