Adaptation and the Edge Effects of Latin American Cultures Elisabeth L. Austin, Elena Lahr-Vivaz, 2025-11-10 This book delves into the vibrant and dynamic cultural landscape of Latin America exploring the creative frictions that arise from the coexistence among and tensions between diverse cultures Inviting readers to think through critical questions about cultural and textual adaptation this book examines how stories texts genres and cultural practices develop into configurations that are both distinct and intimately connected to their progenitors The metaphor of the edge effect borrowed from ecology serves as a lens to understand these productive tensions This book addresses a wide range of topics including cultural change in the Americas intertextual relationships and adaptive histories Ideal for scholars in Latin American studies film studies and adaptation studies this book offers a novel analytical framework that enriches current academic practices and theories of hybridity contact zones and rhizomatic connections It is a must read for anyone interested in the complex interrelations between Latin American cultures and their textual and artistic expressions

Current Ornithology Val Nolan Jr., Ellen D. Ketterson, Charles Thompson, 2000-05-31 Current Ornithology publishes authoritative up to date scholarly reviews of topics selected from the full range of current research in avian biology Topics cover the spectrum from the molecular level of organization to population biology and community ecology The series seeks especially to review 1 fields in which an abundant recent literature will benefit from synthesis and organization or 2 newly emerging fields that are gaining recognition as the result of recent discoveries or shifts in perspective or 3 fields in which students of vertebrates may benefit from comparisons of birds with other classes All chapters are invited and authors are chosen for their leadership in the subjects under review

Forest Fragmentation James Arthur Rochelle, Leslie A. Lehmann, Joe Wisniewski, 1999-01-01 The book contains 15 chapters and provides an overview and synthesis of forest fragmentation and its influences on key ecological processes and vertebrate productivity Land use practices and their effects on vertebrate populations and productivity are discussed and examples of several planning approaches to address landscape level management effects are described

Edge Effects Chris Anderson, 1993-11 Buying his dream house several years ago on the forest's edge near Corvallis Oregon essayist Chris Anderson hoped to find the joys of rural living Despite interminable Mr Blandings experiences he lived embowered by 12 000 acres of seemingly endless fir trees But not for long The McDonald Dunn Forest was about to become the site of a disturbing research project Little did Anderson know when he bought his house that in addition to studying the ecological effects of clear cutting the researchers wanted to see how urban fringe dwellers might be affected too The shock of that harvest compelled the essays in this vibrant graceful record of the relationship between the forest and Anderson's life on its boundary

Tropical Forest Canopies: Ecology and Management Karl-Eduard Linsenmair, 2001

Conservation Biology Principles for Forested Landscapes Joan Voller, Scott Harrison, 1998 This book is intended to provide information to those who wish to interact with the landscape in an ecologically sustainable manner

Practitioners charged with the administration of land based programs in industry and government will find the information presented useful. It should also be a resource for many community groups involved in land use decision making. Humans continue to use forests and make decisions about land use without perfect information. Conservation Biology Principles for Forested Landscapes is intended to enable the improvement of planning and decision making processes by providing ecological information on issues of forest use. Current approaches are networking. Where information exists on new ecologically sustainable approaches, practitioners should switch. Where the information on a better approach is not yet available, practitioners should replace the current inappropriate approach with a variety of flexible ones that offer the opportunity to change with new knowledge.
