Conference, Freda Satow, 1992      The Present and Future of Immunology Education Andrea Bottaro, Deborah M. Brown, John Gregory Frelinger, 2022-01-24 The explosion of basic and applied immunology in the first decades of the 21st century has brought forth new opportunities and challenges for immunology education at all academic levels from professional to undergraduate medical graduate and post graduate instruction Moreover developing methods and techniques for educating general audiences on the importance and benefits of immunology will be critical for increasing public awareness and support One major immediate challenge consists in accommodating within the confines of traditional immunology curricula a body of knowledge that continues to grow exponentially in both size and complexity Furthermore the practical toolbox of immunological research has vastly expanded and even in the present environment of highly interdisciplinary and collaborative science future immunologists will likely need to be at least conversant in for instance computational structural and system biology nanotechnology and tissue engineering At the same time our perspective of the immune system has progressively developed from primarily a host defense mechanism to a fundamental homeostatic system with organism wide physiological and clinical significance and with potentially transformative biotechnological and therapeutic applications As a consequence in addition to stand alone courses immunology is increasingly integrated into other courses or distributed longitudinally throughout a multi year curriculum This necessitates inter disciplinary approaches to reach an expanding range of disciplines as diverse as neurobiology cancer biology oncology infectious diseases pharmacology orthopedics and bioengineering Creative approaches and pedagogical flexibility will be needed to avoid the pitfall of one size fits all instruction and to tailor level and discipline appropriate content to different types of students using multiple teaching formats Finally like most other disciplines immunology education is also under strong pressure to introduce new didactic strategies that are relevant and meaningful to a generation of students who are

digital natives comfortable with and expect on demand and multi modal learning diversified sources and active engagement Thankfully the dynamic and interactive behavior of immune system cells now visualized with striking immediacy by in vivo imaging has the ability to capture and hold the interest of even the most jaded learner The need for an increasingly immunology knowledgeable workforce not just academic and industry scientists but also clinical and research lab technicians biomedical engineers and physicians in a growing array of specialties will also expand job opportunities for immunologists as educators and for content creators dedicated to generating new didactic tools in this field Acknowledgement We acknowledge the initiation and support of this Research Topic by the International Union of Immunological Societies IUIS

**Humanitarian Engineering** Carl Mitcham, David Munoz, 2022-05-31 Humanitarian Engineering reviews the development of engineering as a distinct profession and of the humanitarian movement as a special socio political practice Having noted that the two developments were situated in the same geographical and historical space that is in Europe and North America beginning in the 1700s the book argues for a mutual influence and synthesis that has previously been lacking In this spirit the first of two central chapters describes humanitarian engineering as the artful drawing on science to direct the resources of nature with active compassion to meet the basic needs of all especially the powerless poor or otherwise marginalized A second central chapter then considers strategies for education in humanitarian engineering so conceived Two final chapters consider challenges and implications Table of Contents Engineering Humanitarianism Humanitarian Engineering Humanitarian Engineering Education Challenges Conclusion Humanizing Technology **The 2010 Millennium Development Goals Review summit** Great Britain: Parliament: House of Commons: International Development Committee, 2010-12-19 In 2000 world leaders established the Millennium Development Goals MDGs a set of global targets seeking to reduce poverty and promote development The Department for International Development DFID has made the MDGs a central strategic objective There has been notable progress towards reaching several Goals including those focusing on child mortality and primary education However the Goals seeking improved gender equality and maternal health amongst others are seriously off track This report focuses on a UN Summit 20 22 September 2010 held to review progress achieving MDGs five years before the 2015 deadline Achievement of the Goals depends on two factors namely it is vital that both donor and developing countries fulfil their promises there are a number of off track goals demonstrates that much greater commitment is needed by a number of developing country governments Secondly multilateral organisations notably the UN must work as efficiently as possible to support improved health education and other basic services in developing countries The DFID must continue to press for better co ordination and the amount of funding it provides should be related to success in achieving improvements The DFID should also engage in planning for a new international framework to replace the MDGs after 2015 A review of the effectiveness of the MDGs should be carried out to assess whether this framework represents the best approach to facilitating development before a new set of targets is agreed for the post 2015

framework This new framework should include a greater focus on reaching the most vulnerable people and the very poorest giving higher priority to climate change biodiversity and the environment and addressing population growth

**The New European Frontiers** Milan Bufon, Julian Minghi, Anssi Paasi, 2014-04-11 This book offers a substantial and up dated discussion and presentation of the new European frontiers related to complex and controversial social and spatial re integration issues in multicultural and border regions It represents an inter disciplinary endeavour from human geographers social and political scientists and linguists to understand and interpret the current developments of the European unity in diversity paradigm based on simultaneous and continuous processes of social and spatial convergence and divergence changing territorialities and identities particularly in the wider EU s inner and outer border regions These studies convincingly display the prominence of context in understanding the regional and local geo histories and in making sense of the meanings of borders for social communities and wider societies They also show how re integration potentials of border and multicultural regions are strongly dependent on the creation of a viable multi level social and spatial planning and cooperation system within which both conflict to harmony processes and common cause behaviours and practices may become effective and thus give a new role to local communities in the numerous borderlands across Europe The book offers both a synthesis of current theoretical methodological approaches and an analysis of selected case studies provided by internationally acknowledged scholars It represents a valuable instrument for researchers and students of social and spatial integration human and political geographers social anthropologists and social and political scientists as well as language planners

**The Council of Europe** Aline Royer, Council of Europe, 2010-01-01 The Council of Europe is the oldest of European institutions Under the banner of human rights and democracy it brings together 47 member states ranging from Finland to Turkey and from Switzerland to Russia Its Parliamentary Assembly represents over 800 million Europeans and its conventions For The protection of social and fundamental rights are among the most successful in the world However this organisation receives little recognition and is still frequently confused with the European Union Building upon the momentum created during the celebrations of the Council of Europe s 60th anniversary this publication offers an opportunity to rediscover its history activities and achievements
