Released into the Environment Dan Funck Jensen,Hans-Börje Jansson,Arne Tronsmo,2012-12-06 Microorganisms including those genetically modified GMOs are increasingly being released deliberately into the environment for different purposes One major interest is the use of antagonistic organisms for biological control of pests and plant diseases Both in the development of biocontrol agents and their later risk assessment and product approval there is a need for methods that facilitate monitoring of such introduced microorganisms This book particularly addresses the various approaches for monitoring introduced fungi and the current status of techniques which may be relevant to use are described Such techniques include marker genes and other DNA based techniques serology using polyclonals or monoclonals the use of enzymes or secondary metabolite profiles and electronic noses as well as more traditional methods like dilution plating

Genescapes Stephen Nottingham,2002-05-03 This book introduces the lay reader to the ecological risks associated with transgenic organisms Genetic engineering could make a valuable contribution within agriculture although the initial promise of more abundant food produced in an environmentally friendly manner is not being fulfilled Instead the technology is being promoted at the expense of sustainable alternatives that have fewer environmental and social costs **Hazard**

Identification of Agricultural Biotechnology Ad van Dommelen,1999 This book details opposing scientific claims about the hazard identification of modern biotechnology Offered are remedies to frustrating stalemates in the debate that trace back the conflicting biosafety claims to their experimental basis The purpose of biosafety testing is to identify possible hazards in the use of genetically engineered organisms Presented is an applied philosophy of science that focuses on finding relevant questions The potential of this pragmatic viewpoint is demonstrated in the reconstructions of a number of longstanding controversies in the biotechnology debate *Novel Food and Feed Safety Safety Assessment of Transgenic Organisms, Volume 4* Organisation for Economic Co-operation and Development,2010-12 These OECD Biosafety Consensus Documents identify elements of scientific information used in the environmental safety and risk assessment of transgenic organisms which are common to OECD member countries and some non members associated with the work **Applied and Environmental Microbiology** ,1995 *Impact of Host Population and Catabolic Plasmid on the Fitness of 2,4-dichlorophenoxyacetic Acid Degrading Bacteria* Kirsti Maria Ritalahti,2000 **Plant Breeding Abstracts** ,1996
