Environmental Security and Gender Nicole Detraz, 2014-08-21 Over the past 20 years scholars policymakers and the media have increasingly recognized the links between both traditional and non traditional security issues and the changing condition of the global environment Concepts such as environmental security and resource conflict have been used to hint at these significant linkages While there has been a good deal of scholarly work conducted that seeks to identify the ways that actors link these concepts there has been little examination of the intersection between approaches to environmental security and gender This book explores this intersection to provide an insight into the gendered nature of both global environmental politics and security studies It examines how the issues of security and the environment are linked to theory and practice and the extent to which gender informs these discussions By adopting a feminist environmental security discourse this book provides crucial redefinitions of key concepts and offers new insights into the ways we understand security environment connections Case studies evaluate if and how environment and security discourses are being used to understand a range of environmental issues and how a feminist environmental security discourse contributes to our understanding of security environment connections This multidisciplinary volume draws on literature from the environmental sciences security studies and sociology to highlight the complex human insecurities that often accompany environmental change As conceptualizations of security continue to shift and broaden to include environmental issues and concerns it is imperative that gender informs the debate

Environmental Change and Security Project Report ,1995 Environmental Security in Watersheds: The Sea of Azov Viktor Lagutov,2011-10-23 Watersheds supplying crucial ecosystem services to humans seem to be a logical territorial unit to integrate societal benefits and environmental needs in order to evaluate the sustainability of natural resource use patterns Based on this belief the book is an attempt to initiate a comprehensive environmental security assessment in the basin of the Azov Sea shared by Russia and Ukraine Though the region provides a variety of essential services and plays a strategic role in national and international development plans it has been excluded from most regional environmental discussions At the same time there is an alarming degradation rate of basin freshwater ecosystems that has occurred due to overutilization of certain prioritized services e g transportation The collapse of neglected services e g fishery and freshwater supply poses serious threats to the national economies as well as the local population and to mitigate these threats priority in water management should be given to securing sustainability of the regional freshwater ecosystems In addition to the review of the current status of Azov ecosystem services the authors analyze likely future availability and challenges The relevant experience derived from basin management of the Black Sea and other similar basins is also discussed

The Human Security Paradigm: Challenges & Opportunities Dr. Priti Chahal ,Dr. Meenakshi Mawi ,Dr. Megha Kumari ,2024-12-20 In an era marked by unprecedented global challenges the concept of human security has emerged as a significant framework for rethinking traditional approaches to security Historically security was almost exclusively understood in terms of state sovereignty military capacity and territorial protection However as the world has become more interconnected with transnational threats becoming more complex there has been a growing recognition of the need to move beyond the state centric militarized definition of security The human security paradigm offers an alternative one that emphasizes the security of individuals and communities rather than just that of states This shift reflects the reality that the threats faced by people today are multidimensional and transcend national borders From poverty inequality and environmental degradation to terrorism pandemics and cyber threats the sources of insecurity are increasingly non military in nature demanding a more comprehensive and people centric approach

Environmental Threats and National Security Braden R. Allenby,T. J. Gilmartin,1997

The Environment and Security Alan Dupont,1998

The Politics of Unsustainability Ingolfur Blühdorn,Ian Welsh,2008 Two decades after its launch by the UN Brundtland Commission the paradigm of sustainability seems to have reached its limits Whilst the concept figures more prominently in public debate and policy making than ever before the ecological footprint of advanced liberal consumer societies continues to grow and the forceful economic development of countries such as China and India reinforces concerns that the world is moving further away from rather than closer towards the ideal of sustainability Given the proven failure of ecological modernisation strategies to secure sustainability the traditional question How may our established lifestyles and socio economic practices be made more sustainable needs to be supplemented by a second equally important question How do advanced modern consumer democracies try and manage to sustain what is known to be unsustainable Put differently traditional research into the politics of sustainability needs to be supplemented by a new line of research into the politics of unsustainability Exploring the recent transformation of eco political discourses and a variety of ways in which the unfolding paradox of sustaining the unsustainable is being managed the present volume pioneers this new research agenda This book was previously published as a special issue of Environmental Politics

Insurgency, Terrorism, and Crime Max G. Manwaring,2008 In this book national security expert Max G Manwaring examines the ascendance of nonstate actors in a

geopolitical world He shows how such actors have emerged parallel to the state centric international system and have proliferated in nations undergoing crisis or collapse Manwaring invites policy makers to look past familiar insurgencies such as those in Vietnam and Iraq and consider global security problems from multiple perspectives He concludes that the use of calculated political and psychological power may be the most effective response in many situations Insurgency Terrorism and Crime translates the cogent lessons of recent events into workable strategies for tomorrow s leaders Provocatively concluding that a proper combination of coordinated political psychological and military responses can defeat a new generation of enemies this book is required reading for students of national security policy and foreign policy analysis Book Jacket

Manwaring,2010 As the first decade of the twenty first century has made brutally clear the very definitions of war and the enemy have changed almost beyond recognition Threats to security are now as likely to come from armed propagandists popular militias or mercenary organizations as they are from conventional armies backed by nation states In this timely book national security expert Max G Manwaring explores a little understood actor on the stage of irregular warfare the gang Since the end of the Cold War some one hundred insurgencies or irregular wars have erupted throughout the world Gangs have figured prominently in more than half of those conflicts yet these and other nonstate actors have received little focused attention from scholars or analysts This book fills that void Employing a case study approach and believing that shadows from the past often portend the future Manwaring begins with a careful consideration of the writings of V I Lenin He then scrutinizes the Piqueteros in Argentina gangs in Colombia private armies in Mexico Hugo Chavez s use of popular militias in Venezuela and the looming threat of Al Qaeda in Western Europe As conventional warfare is increasingly eclipsed by these irregular and uncomfortable wars Manwaring boldly diagnoses the problem and recommends solutions that policymakers should heed **Science & Technology Review** ,2011 **Landscape and Sustainability, Global Change,**
