Environmental Electrochemistry:

Environmental Electrochemistry Krishnan Rajeshwar, Jorge G. Ibanez, 1997-11-07 The first book of its kind Environmental Electrochemistry considers the role that electrochemical science and engineering can play in environmental remediation pollution targeting and pollutant recycling Electrochemical based sensors and abatement technologies for the detection quantification and treatment of environmental pollutants are described Each chapter includes an extensive listing of supplemental readings with illustrations throughout the book to clarify principles and approaches detailed in the text The first book to review electro and photoelectrochemical technologies for environmental remediation pollution sensors and pollutant recycling Applicable to a broad audience of environmental scientists and practicing electrochemists Includes both laboratory concepts and practical applications Electrochemistry for the Environment Christos Comninellis, Guohua Chen, 2009-10-15

Wastewater treatment technology is undergoing a profound transformation due to the fundamental changes in regulations governing the discharge and disposal of hazardous pollutants Established design procedures and criteria which have served the industry well for decades can no longer meet the ever increasing demand Toxicity reduction requirements dictate in the development of new technologies for the treatment of these toxic pollutants in a safe and cost effective manner For most among these technologies are electrochemical processes While electrochemical technologies have been known and utilized for the treatment of wastewater containing heavy metal cations the application of these processes is only just a beginning to be developed for the oxidation of recalcitrant organic pollutants In fact only recently the electrochemical oxidation process has been recognized as an advanced oxidation process AOP This is due to the development of boron doped diamond BDD anodes on which the oxidation of organic pollutants is mediated via the formation of active hydroxyl radicals *Environmental*
