Focus on Special Educational Needs explores the characteristics of effective classroom instruction for language learners aged 5-18 with special educational needs. It guides teachers and other educational practitioners to combine their perspectives in providing balanced, coordinated, cohesive, and comprehensive approaches. The authors present a framework for developing inclusive learning environments which are culturally and linguistically responsive, based on strengths-based perspectives. Research studies and examples from the classroom illustrate collaborative practice in action. Additional online resources are available at www.oup.com/elt/teacher/fosen.

Cristina Sánchez-López is a teacher educator in Chicago at the Illinois Resource Center Multilingual Cultural Classroom and Paridad Education Consulting. Theresa Young is a speech language pathologist and educator in private practice in Parry Sound, Ontario. This excellent book provides detailed guidance for educating language learners with special educational needs based on a thorough review of classroom research. The authors advocate approaches which build upon all the assets learners bring to the classroom and integrate these with decades of best practices in second language development and special education. This will be a welcome resource to graduate students and practicing teachers alike.

Dr. Nadeen T. Ruiz, School of Education, University of California at Davis *Handbook of Effective Inclusive Schools* James McLeskey, Fred Spooner, Bob Algozzine, Nancy L. Waldron, 2014-05-16

Over the last decade, the educational context for students with disabilities has significantly changed, primarily as a result of mandates contained in NCLB and IDEA. The purpose of this book is to summarize the research literature regarding how students might be provided classrooms and schools that are both inclusive and effective. Inclusive schools are defined as places where students with disabilities are valued and active participants in academic and social activities and are given supports that help them succeed. Effectiveness is addressed within the current movement toward multi-tiered systems of support and evidence-based practices that meet the demands of high-stakes accountability.
