Experiments In Form A Foundation Course In Three Dimensional Design:

Experiments in Form Peter Pearce, Susan Pearce, Susan M. Pearce, 1980 **Experiments in form; a foundation course in three-dimensional design** P. Pearce, 1980 Formulations Andrew Witt, 2022-01-11 An investigation of mathematics as it was drawn encoded imagined and interpreted by architects on the eve of digitization in the mid twentieth century In Formulations Andrew Witt examines the visual methodological and cultural intersections between architecture and mathematics The linkages Witt explores involve not the mystic transcendence of numbers invoked throughout architectural history but rather architecture s encounters with a range of calculational systems techniques that architects inventively retooled for design Witt offers a catalog of mid twentieth century practices of mathematical drawing and calculation in design that preceded and anticipated digitization as well as an account of the formal compendia that became a cultural currency shared between modern mathematicians and modern architects Witt presents a series of extensively illustrated biographies of method episodes that chart the myriad ways in which mathematics particularly the mathematical notion of modeling and drawing was spliced into the creative practice of design These include early drawing machines that mechanized curvature the incorporation of geometric maquettes theorems made flesh into the toolbox of design the virtualization of buildings and landscapes through surveyed triangulation and photogrammetry formal and functional topology stereoscopic drawing the economic implications of cubic matrices and a strange synthesis of the technological mineral and biological crystallographic design Trained in both architecture and mathematics Witt uses mathematics as a lens through which to understand the relationship between architecture and a much broader set of sciences and visual techniques Through an intercultural exchange with other disciplines he argues architecture adapted not only the shapes and surfaces of mathematics but also its values and epistemic ideals Color Model Environments Harold Linton, 1985 Industrial Design Magazine , 1981 Vol for 1982 includes special issue Designer s choice Industrial design s 28th annual review *Design Resources* Lawrence Von Bamford, 1984 **Books in Print** , 1981 **Digital Intentions Explorations and Accidents** , 2008-01-15 Digital design as seen on the following pages is no longer a discipline with a single visual signature redefining what is visually real but rather branches into a myriad of visual languages intellectual pursuits and experiential tones The frames that used to define digital creativities even a decade ago are constantly being re framed Accordingly essays in this compilation were divided into four subject categories directing the reader s attention to various thematic readings This division reflects the ever growing richness and diversity of digitally created content However any categorization is a simplified convention that provides artificial boundaries The included projects cover broad conceptual visual and educational themes While each paper is internally consistent and coherent they often cross established boundaries and venture into the unknown **Paperbound Books in Print** , 1983 **Vision and Invention** Calvin Harlan, 1986 Design , 1981
