Evidence Based Public Health:

Evidence-Based Public Health Ross C. Brownson, Elizabeth A. Baker, Terry L. Leet, Kathleen N. Gillespie, William R. True, 2010-12-03 There are at least three ways in which a public health program or policy may not reach stated goals for success 1 Choosing an intervention approach whose effectiveness is not established in the scientific literature 2 Selecting a potentially effective program or policy yet achieving only weak incomplete implementation or reach thereby failing to attain objectives 3 Conducting an inadequate or incorrect evaluation that results in a lack of generalizable knowledge on the effectiveness of a program or policy and 4 Paying inadequate attention to adapting an intervention to the population and context of interest To enhance evidence based practice this book addresses all four possibilities and attempts to provide practical guidance on how to choose carry out and evaluate evidence based programs and policies in public health settings It also begins to address a fifth overarching need for a highly trained public health workforce This book deals not only with finding and using scientific evidence but also with implementation and evaluation of interventions that generate new evidence on effectiveness Because all these topics are broad and require multi disciplinary skills and perspectives each chapter covers the basic issues and provides multiple examples to illustrate important concepts In addition each chapter provides links to the diverse literature and selected websites for readers wanting more detailed information An indispensable volume for professionals students and researchers in the public health sciences and preventative medicine this new and updated edition of *Evidence Based Public Health* aims to bridge research and evidence with policies and the practice of public health

Evidence-Based Public Health and Director of the Prevention Research Center Ross C. Brownson Professor of Epidemiology, Elizabeth A. Baker Associate Professor of Behavioral Science and Health Education, Terry L. Leet Assistant Professor of Epidemiology, Missouri Kathleen N. Gillespie Associate Professor of Health Management and Policy All at St. Louis University School of Public Health, 2002-09-19 Ideally public health practitioners always incorporate scientific evidence in making management decisions developing policies and implementing programs In reality however these decisions are often based on short term demands rather than long term study and policies and programs are sometimes developed from anecdotal evidence To enhance evidence based practice this book provides practical guidance on how to choose carry out and evaluate evidence based programs and policies in public health settings It deals not only with finding and using scientific evidence but also with implementing and evaluating interventions that generate new evidence on effectiveness Because all these topics are broad and require multi disciplinary skills and perspectives each chapter covers the basic issues and provides multiple examples to illustrate important concepts The book presents a sequential framework for addressing public health issues that includes developing an initial statement of the issue quantifying the issue searching the scientific literature and organizing information developing and prioritizing program options developing an action plan and implementing interventions and evaluating the program or policy

Evidence-Based Public Health Ross C.

Brownson, Jonathan E. Fielding, Christopher M. Maylahn, 2009 Despite the many accomplishments of public health a greater attention to evidence based approaches is warranted This article reviews the concepts of evidence based public health EBPH on which formal discourse originated about a decade ago Key components of EBPH include making decisions on the basis of the best available scientific evidence using data and information systems systematically applying program planning frameworks engaging the community in decision making conducting sound evaluation and disseminating what is learned Three types of evidence have been presented on the causes of diseases and the magnitude of risk factors the relative impact of specific interventions and how and under which contextual conditions interventions were implemented Analytic tools e g systematic reviews economic evaluation can be useful in accelerating the uptake of EBPH Challenges and opportunities e g political issues training needs for disseminating EBPH are reviewed The concepts of EBPH outlined in this article hold promise to better bridge evidence and practice *Evidence-Based Public Health* Ross C.
