Creative Destruction Raul Luciano Katz,2002 Schumpeter s framework of creative destruction applied to the rapidly changing telecommunications and related

Internet industries More than fifty years ago Joseph Schumpeter stated that processes intrinsic to a capitalist society produce a creative destruction whereby innovations destroy obsolete technologies only to be assaulted in turn by newer and more efficient rivals This book asks whether the current chaotic state of the telecommunications and related Internet industries is evidence of creative destruction or simply a result of firms governments and others wasting valuable resources with limited benefits to society as a whole In telecommunications for example wireless IP and cable based technologies are all fighting for a share of the market currently dominated by older circuit switched copper terminated networks This process is accompanied by mergers acquisitions bankruptcies and investment and divestment in worldwide markets The selections discuss the primary challenge facing firms governments and other players how to exploit the opportunities created by such destructive dynamics They highlight the importance of national regulations promoting competition and nonmonopolistic market structures as well as the role of new technologies such as the Internet in driving down the price and speeding the diffusion of innovative products and services in telecommunications media electronic retailing and other new economy industries

Taxation in the Digital Economy Nella Hendriyetty,Chris Evans,Chul Ju Kim,Farhad Taghizadeh-Hesary,2022-07-11 A robust and efficient tax administration in a modern tax system requires effective tax policies and legislation Policy frameworks should cover all aspects of tax administration and include the essential processes of capturing processing analyzing and responding to information provided by taxpayers and others concerning taxpayers affairs By far the greatest challenges facing tax administrations in all countries are those posed by the continuing developments in the digital economy Whereas societies are grappling to come to terms with the transitions from the third industrial or digital revolutions revenue authorities grapple with the consequences for the sustainability of their tax bases and the efficient administration and collection of taxes This book presents a critical review of

the status of tax systems in Asia and the Pacific in the era of the digital economy The book suggests how countries can maximize their domestic resource mobilization when confronted by the challenges that digitalization inevitably produces as well as how they can best harness or take advantage of aspects of digitalization to serve their own needs The full implications of the COVID 19 crisis are still too uncertain to predict but it is clear that the crisis will accelerate the trend towards digitalization and also increase pressures on public finances This in turn may shape the preference for and the nature of both multilateral and unilateral responses to the tax challenges posed by digitalization and the need to address them This book will be a timely reference for those researching on taxation in digital economy and for policy makers The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
