The Need for Humility in Policymaking Stefanie Haeffele, Anne Hobson, 2019-08-22 Regulations impact a wide array of market and social activities that influence our daily lives Regulations are attempts to correct perceived market failures caused by information asymmetries externalities and principal agent problems and to provide public goods which would otherwise be underprovided Government actors are responsible for identifying these issues weighing the costs and benefits of intervention and designing and implementing regulations to improve society Good regulations help mitigate issues in the economy without inciting new problems and without the costs exceeding the benefits of intervention This requires intensive analysis and an awareness of the complexities of social life Our society is complex and dynamic where people face knowledge and incentive problems whether in the market politics or civil society By examining this complex reality we can better understand why regulations arise and persist and the challenges of reform We argue that this approach to policymaking and policy analysis requires humility an acknowledgment of the challenges we face when intervening in our society This volume intends to cultivate an appreciation for the complexity of human decision making and the incentives that drive human behavior By examining specific policy changes it will delve into the effects of and lessons learned from regulations in financial markets computer and internet governance and health care innovation and delivery This volume will be of interest to students scholars and policymakers who seek to understand the complexities of regulation in a dynamic social world

Regulating Capital David Andrew Singer, 2015-11-15 Financial instability threatens the global economy The volatility of capital movements across national borders has led many observers to argue for a reformed global financial architecture a body of consistent rules and institutions to prevent financial crises Yet regulators have a decidedly mixed record in their attempts to create global standards for the financial system David Andrew Singer seeks to explain the varying pressures on regulatory agencies to negotiate internationally acceptable rules and suggests that the variation is largely traceable to the different domestic political pressures faced by regulators In *Regulating Capital* Singer provides both a theory of the effects of domestic pressures on international regulation and a detailed analysis of regulators attempts at international rulemaking in banking securities and insurance Singer addresses the complexities of global finance in an accessible style and he does not turn away from the more dramatic aspects of globalization he makes clear the international implications of bank failures and stock market crashes the rise of derivatives and the catastrophic financial losses caused by Hurricane Katrina and the events

borders of the state but not completely beyond the state as such Globalization as opposed to former developments in the internationalization of the economy is characterized by its transnational form i e it is based on exchange processes which to a greater or lesser degree bypass both the state and the traditional international character of the world economy of the past
