

Introduction: Globalization–Poverty Channels and Case Studies from Sub-Saharan Africa

Machiko Nissanke and Erik Thorbecke*

In 2004 the United Nations University World Institute for Development Economics Research (UNU-WIDER) embarked on a large-scale research project on the ‘Impact of Globalization on the World’s Poor’ co-directed by Machiko Nissanke and Erik Thorbecke. The first conference was essentially conceptual in nature, meant to understand better the various mechanisms and channels through which globalization affects the poor either directly or indirectly. The other three conferences focused on each of the major regions of the developing world: Asia, Africa and Latin America.

The objectives of this introduction are threefold: first, to review briefly how the forces of globalization influence poverty in general; second, to describe and discuss the main transmission channels and mechanisms; and third to analyze the impact of globalization on Africa and present an overview of the six Africa case studies included in this issue.

1. The Impact of Globalization on the World’s Poor

Globalization provides a strong potential for a major reduction in poverty in the developing world because it creates an environment conducive to faster economic growth and transmission of knowledge.¹ However, structural factors and policies within the world economy and national economies have impeded the full transmission of the benefits of the various channels of globalization for poverty reduction. In particular sub-Saharan Africa (SSA) has been relatively less affected by the forces of globalization than other parts of the world.

World income distribution continues to be very unequal and many poor countries particularly in Africa are stagnating. Moreover, there is much empirical evidence that openness contributes to more within-country

Mujeri, Neaz Mujeri, 2020-11-07 This book explores the diverse experience of Bangladesh's development over the last fifty years and provides systematic explanations of its success in socioeconomic development It also assesses future trends on the basis of past experiences It is widely acknowledged that Bangladesh provides one of the most striking examples in the study of present day development along with rapid growth and catching up The analysis highlights the development traps that

Bangladesh faced during its journey and the ones that may have to be faced in the coming decades in order to move towards prosperity. The book asserts that explaining Bangladesh's development is not for the simpleminded; any single mono-causal explanation for Bangladesh's development is bound to fall down in the face of reality. Modeling Public Policies in Latin America and the Caribbean Carlos de Miguel, 2010. In an increasingly integrated world where the pace of change is accelerating, policy decisions need to be taken with little hesitation. However, their development effectiveness requires that they are also based on solid analytical foundations. Given the existence of information asymmetries and coordination failures, multilateral development institutions have an opportunity to support their member countries in the assessment of policies that require complex background analysis, particularly when their effects spill over beyond the border of any given country. In this context, the Inter American Development Bank (IDB) and the Economic Commission for Latin America and the Caribbean (ECLAC) have formed a partnership to promote a regional network of computable general equilibrium (CGE) modellers that facilitates the exchange of analytical findings, techniques and data with the ultimate objective of better serving policy makers in policy formulation. The regional meetings of CGE modellers held annually in a different country of the region have been instrumental in promoting intraregional transfer of analytical technologies and in bringing the region closer to international best practices. This book includes a selection of studies discussed in past annual meetings on modelling. They deal with issues such as trade policy, regional integration, trade in services, fiscal policy, the impact of food price surges and climate change, all based on comparable methodologies and shed light on crucial implications of crucial policy alternatives that Latin American regional policymakers are currently facing.

Advancing Development G. Mavrotas, A. Shorrocks, 2007-01-05. This book reflects on current thinking in development economics and on what may happen over the next two decades. As well as studying development economics in retrospect, the volume explores the current debates and challenges and looks forward at the problems that affect the global capacity to achieve the Millennium Development Goals.

Globalization in the 21st Century Berch Berberoglu, 2010-03-15. This book examines the development and transformation of global capitalism in the late 20th and early 21st century. It analyzes the dynamics and contradictions of the global political economy through a comparative historical approach based on class analysis. After providing a critical overview of neoliberal capitalist globalization over the past three decades, the book examines the emergence of new forces on the global scene and discusses the prospects of change in the global economy in a multi-polar direction in the decades ahead. The book concludes by focusing on the mass movements that are playing a central role in bringing about the transformation of global capitalism.
