**Globalizations from Below** Theodor Tudoroiu, 2022-09-09 Globalizations from Below uses a Constructivist International Relations approach that emphasizes the centrality of normative power to analyze and compare the four globalizations from below These are 1 the counter hegemonic globalization represented by the movement of movements of alter globalization transnational social activists who try to put an end to the Neoliberal nature of the Western centered globalization from above 2 the non hegemonic globalization enacted by ant traders that are part of the transnational informal economy 3 the partially similar Chinese centered globalization whose entrepreneurial migrants are strongly influenced and instrumentalized by the Chinese state and 4 the first wave globalization from below that paralleled and outlived the 1870 1914 globalization from above This book identifies their common features and uses them to define the concept of globalization from below as a set of socio economic or socio political processes that involve large transnational flows of people goods and or ideas characterized at least in part by informality They are enacted by entrepreneurial or activist individuals who either take advantage of the normative power of the hegemon at the origin of an international order and an associated globalization from above or explicitly or implicitly transgress contest and try to redefine dominant economic legal political and socio cultural norms thus challenging the existing international order and globalization from above By

constructing a unified theoretical framework this book attempts to open a new field of interdisciplinary research that should take globalizations from below out of their current scholarly marginality This is one of the first scholarly works to collectively present more than one globalization from below and will be of great interest to students scholars and researchers of International Relations International Political Economy Development Studies Economic History Anthropology Diaspora Studies and Chinese Studies

**Globalization from Below** Alejandro Portes,1997 **China's Globalization from Below** Theodor Tudoroiu,2021-09-09 This book analyzes the Chinese centered globalization from below brought about by China s entrepreneurial migrants and conceived of as a projection of Chinese power in the Belt and Road Initiative partner states It identifies the features of this globalization from below scrutinizes its mutually reinforcing relationship with China s globalization from above and shows that these two globalizations are intrinsically related to the construction of a new international order It outlines how the actors in China s globalization from below include Chinese emigrants who are located in informal transnational economic networks It reveals that Beijing has enacted many laws that compel these emigrants to contribute to the development of their country of origin but also influences them through the successful promotion of a specific type of deterritorialized nationalism and that China is ready to impose harsh punitive actions on political elites in partner states which fail to protect its migrants or limit their economic activities Finally it argues that China s globalization from below is fundamentally different from the non hegemonic globalization from below represented by among others Lebanese and East Indian traders and that China s globalization from below is rather a self interested national strategy intended to support the construction of a Chinese centered international order

**Review: Globalization from Below: Transnational Activists and Protest Networks** Marta Kolarova,2007 **Law and Globalization from Below**

Boaventura de Sousa Santos,César A. Rodríguez-Garavito,2005-09-08 This book is an unprecedented attempt to analyze the role of the law in the global movement for social justice Case studies in the book are written by leading scholars from both the global South and the global North and combine empirical research on the ground with innovative sociolegal theory to shed new light on a wide array of topics Among the issues examined are the role of law and politics in the World Social Forum the struggle of the anti sweatshop movement for the protection of international labour rights and the challenge to neoliberal globalization and liberal human rights raised by grassroots movements in India and indigenous peoples around the world These and other cases the editors argue signal the emergence of a subaltern cosmopolitan law and politics that calls for new social and legal theories capable of capturing the potential and tensions of counter hegemonic globalization

**Globalization from Below?** Cindy Hettiarachchi,2014 This thesis offers a micro level analysis of labour and women s organizing in the context of globalization through the case study of the Comit Fronterizo de Obrer s CFO from 1978 to 2009 We will see how one organization s journey can give us insights into the complexities of local organizing and transnational networking in the context of globalization This case study can be seen as a lens through which we can examine the changing

context of labour and women's organizing in the distinct maquiladora environment My work positions itself in the zglobalization from above and zglobalization from below debate specifically around the question of transnational social movements that form the zglobalization from below category in the context of a political economy analysis However where my thesis differs from a more traditional analysis of the resistance to globalization such as that found in the global justice movements or alter globalization movements is in its focus on the complexities of organizing at the local level and the pressures that these local organizations feel from above from their transnational partners What this thesis adds to the literature are the stories from the actual members of the organization about the structure the decision making process of their organization the role of the leadership and the connections between the local organizing and the transnational civil society partners The complex history of an organization that has been there since the beginning of the maquiladora industry allows us a better understanding of the changing conditions and struggles these workers have faced This journey through the history of the CFO the richness of this empirical data encompassing more than 30 years of organizing in the maquiladora zone of Northern Mexico also allows us to explore zglobalization from below through different lens This thesis brings in a micro detail analysis of a specific organization in a specific context where we can see clearly transnational civil society linkages and the impact of globalizing capitalist neoliberal economy As such this research can offer us new insights into the intricacies of local global linkages and thus contribute to an area often neglected or underdeveloped in international relations

IR **Globalization from Below** Donatella Della Porta, Presenting the first systematic empirical research on the global justice movement Globalization from Below analyzes a movement from the viewpoints of the activists organizers and demonstrators themselves The authors traveled to Genoa with anti G8 protesters and collected data from more than 800 participants They examine the interactions between challengers and elites and discuss how new models of activism fit into current social movement work *Political Economy and the Changing Global Order* Richard Stubbs, Geoffrey R. D. Underhill, 2006 Covering the basics necessary for a course in international political economy IPE this text comes from a non American critical perspective and the contributors are drawn from prominent scholars of IPE around the world

**Community Development** Gary Craig, 2000 **The Journal of Applied Social Sciences**, 1998 [An Anthology of Nonviolence](#) Krishna Mallick, Doris Hunter, 2002-09-30 What is the basis for choosing a nonviolent response to conflict and violence By presenting and analyzing some of the most significant answers that have been given to this question throughout history this anthology of writings from both Western and nonwestern traditions proposes principled and strategic nonviolence as a realistic alternative It includes a selection of historical sources on nonviolence ranging from the Bhagavad Gita to the Bible as well as a wide range of writings by authors such as Gandhi Martin Luther King Jr and Nelson Mandela who have contributed to both the theory and the practice of nonviolence Besides tracing the historical development of the concept this volume also suggests ways of applying nonviolence to our everyday lives in the first decade of the 21st century

which the United Nations General Assembly has declared to be the Decade for Education for a Culture of Peace and Nonviolence

*What Went Wrong with "history from Below"* Vinay Bahl, 2005

While refuting contemporary fashionable discourse on History from below which is based on cultural determinism the author of the present volume urges scholars to use their own innate creativity as human agency collectively to build an alternative theoretical framework that can open up the possibility of creating an alternative state of being and alternative kinds of societies While suggesting one of many possible alternatives the author has attempted to reinstate in the present volume the notion of human agency as human being's innate capacity for creativity which is closely related to the concept of humaneness Author believes that such interpretation will open up the possibility of developing a new theoretical framework that will be devoid of binaries such as traditional modern core periphery progressive backward national global Based on these ideas the present volume is an attempt to show one of many possibilities of writing a history of the world from an alternative perspective derived from the experiences of the social formations cultural formations and class struggles in India The focus on India is important not merely as a local history or colonial history because it represents the historical experiences of one billion plus people with all possible historical political economic and cultural scenarios and its interactions with many other societies over time Author hopes that suggestions hypothesized in this volume might help in writing histories everywhere of women working people oppressed people oppressed societies as well as of oppressive societies from the vantage point of their own societies and their interactions with other societies without using binary terms Such history writing will allow oppressed people and oppressed societies to break away from the prevailing notion of inevitable fate about their present miserable condition and hopeless future choices as they are made to believe about the inevitability of globalization about the so called development and their consequences

**Global Orders and Civilizations** Sadik Ünay, Muzaffer Şenel, 2009

The explosion of new themes and working areas in social sciences in the aftermath of the Cold War stimulated the cultural turn of the previous decades and strengthened the position of the notion of civilization as a unit of analysis and locus of academic debate in the fields of history philosophy sociology political science and international relations Given the fabricated and standardized nature of recent literature on political economic and socio cultural aspects of globalization it is crystal clear that historically and philosophically enlightened works written from the perspective of civilizational transformation will provide the much needed sophistication to conventional social science analyses trying to elucidate the organizing principles of the global order This novel collection represents a path breaking work in the field of global civilizational studies by constituting an interdisciplinary and theoretically informed platform on which complex debates on the political economic socio cultural philosophical and ecological aspects of the global order could be conducted The editors Sadik Ünay and Muzaffer Şenel managed to gather a truly original collection of articles from some of the leading authorities and promising academics on the theme of global orders with special reference to a civilization transformation covering a wide spectrum in time and space

from Antique Greece to the Islamic World from Europe to the US and from East Asian history to current globalizations
