From Primeval Chaos To Infinite Intelligence:

From Primeval Chaos to Infinite Intelligence A. Issar, 1995 An examination of some of the philosophical and physical aspects of the nature of information Chapters discuss such areas as entropy quantum physics and evolution [The Cosmic Breath](#) Amos Yong, 2012-05-10 Recent thinking in the interfaith dialogue and in the theology science dialogue have taken a pneumatological turn The Cosmic Breath explores this pneumatological theology as unfolded in the Christian Buddhist dialogue alongside critical interaction with the theology and science conversation As an attempt in comparative and constructive Christian philosophical theology its central thesis is that a pneumatological approach to Buddhist traditions in further dialogue with modern science generates new philosophical resources that invigorate Christian thinking about the natural world and humanity's place in it The result is a transformation of the Buddhist Christian dialogue from insights generated in the theology and science interface and a contribution to the religion and science dialogue from a comparative theological and philosophical perspective *Expanding Humanity's Vision Of God* Robert Herrmann, 2009-08-15 How has our understanding of our world and our place in the universe changed in recent decades through the momentous discoveries of science Do recent developments in the philosophy of science which place limitations on scientific knowing provide a more level playing field This collection of essays and sermons which have not been readily available before address these thought provoking questions The John Templeton Foundation sponsored an essay and sermon contest to convey an expanded vision of God one that is informed by recent discoveries of science on the nature of the universe and the place we have in the world These selections are the winners of that competition The book is divided into three sections Contemporary Science Raising Theological Questions New Visions of Theology and Historical and Philosophical Perspectives on the Science Religion Dialogue The essays cover such areas as physics theology cosmology origins and artificial intelligence There is another way to conceive our life together There is another way to conceive of our life in God but it requires a different worldview not a clockwork universe in which individuals function as discrete springs and gears but one that looks more like a luminous web in which the whole is far more than the parts In this universe there is no such thing as an individual apart from his or her relationships Every interaction between people and people between people and things between things and things changes the face of history Life on earth cannot be reduced to four sure fire rules It is an ever unfolding mystery that defies precise prediction Meanwhile in this universe there is no such thing as parts The whole is the fundamental unit of reality Barbara Brown Taylor *Physics and Faith* **Divine Action and Natural Selection** Joseph Seckbach, 2009 The debate between divine action or faith and natural selection or science is garnering tremendous interest This book ventures well beyond the usual contrasting American Protestant and atheistic points of view and also includes the perspectives of Jews Muslims and Roman Catholics It contains arguments from the various proponents of intelligent design creationism and Darwinism and also covers the sensitive issue of how to incorporate evolution into the secondary school biology curriculum Comprising

contributions from prominent award winning authors the book also contains dialogs following each chapter to provide extra stimulus to the readers and a full picture of this OC hotOCO topic which delves into the fundamentals of science and religion

Strike the Rock and There Shall Come Water Arie S. Issar,2013-10-11 This book presents an update and revision of the book *Water Shall Flow from the Rock Hydrogeology and Climate in the Lands of the Bible* by A Issar published by Springer Verlag in 1990 The enormous quantity and quality of new data added since 1990 called for a thorough update Another reason for this work is the better understanding achieved since the initial book was published about the role which climate plays in shaping the history of the Lands of the Bible Albeit the fact that the impact of climate change was touched upon rather widely in the first book still without interweaving the new data and understanding the picture would have remained partial *Climate Change - Environment and Civilization in the Middle East* Arie S. Issar,A. Issar,Mattanyah Zohar,2004 This survey of ancient levels of lakes rivers and sea and changes in stalagmites and sediments shows an astonishing correlation between climate change and rise and fall of civilizations in the Middle East Warm periods were characterized by aridization economic crisis and mass migration Cold periods brought abundant rain prosperity and settlement The authors conclude that climate change was the decisive factor in the origins of the cradle of civilization
