Form Function In Architecture:

Form and Function Horatio Greenough, 2023-11-15 This book offers sound advice to practitioners of all the arts and sound reasoning to students of aesthetics Stating his principles in the mid nineteenth century Greenough was three generations ahead of his time He reads today like a progressive contemporary and many an architect artist and student of art may benefit by what he has to say It was Greenough not Whitman who first protested against meaningless ornamentation It was Greenough not Ruskin who first expressed the idea that the buildings are art of a people express their morality It was Greenough not Le Corbusier who first said that buildings designed primarily for us may be called machines It was Greenough not Louis Sullivan who first enunciated the principle that in architecture form must follow function This book offers sound advice to practitioners of all the arts and sound reasoning to students of aesthetics Stating his principles in the mid nineteenth century Greenough was three generations ahead of his time He reads today like a progressive conte

Architecture Theory since 1968 K. Michael Hays, 2000-02-28 An anthology of the pivotal theoretical texts that have defined architecture culture in the late twentieth century In the discussion of architecture there is a prevailing sentiment that since 1968 cultural production in its traditional sense can no longer be understood to rise spontaneously as a matter of social course but must now be constructed through ever more self conscious theoretical procedures The development of interpretive modes of various stripes post structuralist Marxian phenomenological psychoanalytic as well as others dissenting or eccentric has given scholars a range of tools for rethinking architecture in relation to other fields and for reasserting architecture's general importance in intellectual discourse This anthology presents forty seven of the primary texts of architecture theory introducing each with an explication of the concepts and categories necessary for its understanding and evaluation It also presents twelve documents of projects or events that had major theoretical repercussions for the period Several of the essays appear here in English for the first time Contributors Diana Agrest Stanford Anderson Archizoom George Baird Jennifer Bloomer Massimo Cacciari Jean Louis Cohen Beatriz Colomina Alan Colquhoun Maurice Culot Jacques Derrida Ignasi de Sol Morales Peter Eisenman Robin Evans Michel Foucault Kenneth Frampton Mario Gandelsonas Frank Gehry Jürgen Habermas John Hejduk Denis Hollier Bernard Huet Catherine Ingraham Fredric Jameson Charles A Jencks Jeffrey Kipnis Fred Koetter Rem Koolhaas Leon Krier Sanford Kwinter Henri Lefebvre Daniel Libeskind Mary McLeod Alberto Perez Gomez Jos Quetglas Aldo Rossi Colin Rowe Massimo Scolari Denise Scott Brown Robert Segrest Jorge Silvetti Robert Somol Martin Steinmann Robert A M Stern James Stirling Manfredo Tafuri Georges Teyssot Bernard Tschumi Anthony Vidler Paul Virilio Mark Wigley

Form and Function Open University, 1975 Provides the evidence for an understanding of the intellectual climate from which the architecture and design of today have sprung with writings of such influential authors as Louis Sullivan Adolf Loos Henry Van de Velde Hermann Muthesius Walter Gropius Le Corbusier Mies van der Rohe Bruno Taut and Frank Lloyd Wright

The Autopoiesis of Architecture, Volume II Patrik Schumacher, 2012-04-24 This is the

second part of a major theoretical work by Patrik Schumacher which outlines how the discipline of architecture should be understood as its own distinct system of communication Autopoiesis comes from the Greek and means literally self production it was first adopted in biology in the 1970s to describe the essential characteristics of life as a circular self organizing system and has since been transposed into a theory of social systems This new approach offers architecture an arsenal of general comparative concepts It allows architecture to be understood as a distinct discipline which can be analyzed in elaborate detail while at the same time offering insightful comparisons with other subject areas such as art science and political discourse On the basis of such comparisons the book insists on the necessity of disciplinary autonomy and argues for a sharp demarcation of design from both art and engineering Schumacher accordingly argues controversially that design as a discipline has its own sui generis intelligence with its own internal logic reach and limitations Whereas the first volume provides the theoretical groundwork for Schumacher s ideas focusing on architecture as an autopoietic system with its own theory history medium and its unique societal function the second volume addresses the specific contemporary challenges and tasks that architecture faces It formulates these tasks looking specifically at how architecture is seeking to organize and articulate the complexity of post fordist network society The volume explicitly addresses how current architecture can upgrade its design methodology in the face of an increasingly demanding task environment characterized by both complexity and novelty Architecture s specific role within contemporary society is explained and its relationship to politics is clarified Finally the new global style of Parametricism is introduced and theoretically grounded

The Autopoiesis of Architecture, Volume I Patrik Schumacher, 2011-04-20 Take a theoretical approach to architecture with *The Autopoiesis of Architecture* which presents the topic as a discipline with its own unique logic Architecture s conception of itself is addressed as well as its development within wider contemporary society Author Patrik Schumacher offers innovative treatment that enriches architectural theory with a coordinated arsenal of concepts facilitating both detailed analysis and insightful comparisons with other domains such as art science and politics He explores how the various modes of communication comprising architecture depend upon each other combine and form a unique subsystem of society that co evolves with other important autopoietic subsystems like art science politics and the economy The first of two volumes that together present a comprehensive account of architecture s autopoiesis this book elaborates the theory of architecture s autopoiesis in 8 parts 50 sections and 200 chapters Each of the 50 sections poses a thesis drawing a central message from the insights articulated within the respective section The 200 chapters are gathering and sorting the accumulated intelligence of the discipline according to the new conceptual framework adopted in order to catalyze and elaborate the new formulations and insights that are then encapsulated in the theses However while the theoretical work in the text of the chapters relies on the rigorous build up of a new theoretical language the theses are written in ordinary language with the theoretical concepts placed in brackets The full list of the 50 theses affords a convenient summary printed as appendix at the

end of the book The second volume completes the analysis of the discourse and further proposes a new agenda for contemporary architecture in response to the challenges and opportunities that confront architectural design within the context of current societal and technological developments

Form Function Finland, 2005 *Echoes in Perspective-Essays on Architecture* Daniel Pavlovits, 2015-05-29 One could read the collection of essays herein as a political voice to architecture and the architecture profession constantly gnawing away at the disciplinary only to find favor in the imaginative intellectually interesting and the creative Beyond embodying a collection of thought on architecture and its discipline the present collection of essays also serves as a not so veiled political program for the possibility of architecture

Structures and Architecture Paulo J. Cruz, 2016-10-14 Although the disciplines of architecture and structural engineering have both experienced their own historical development their interaction has resulted in many fascinating and delightful structures To take this interaction to a higher level there is a need to stimulate the inventive and creative design of architectural structures and to persuade architects and structural engineers to further collaborate in this process exploiting together new concepts applications and challenges This set of book of abstracts and full paper searchable CD ROM presents selected papers presented at the 3rd International Conference on Structures and Architecture Conference ICSA2016 organized by the School of Architecture of the University of Minho Guimar es Portugal July 2016 to promote the synergy in the collaboration between the disciplines of architecture and structural engineering

Elements of Architecture Mikkel Bille, Tim Flohr Sorensen, 2016-02-26 *Elements of Architecture* explores new ways of engaging architecture in archaeology It conceives of architecture both as the physical evidence of past societies and as existing beyond the physical environment considering how people in the past have not just dwelled in buildings but have existed within them The book engages with the meeting point between these two perspectives For although archaeologists must deal with the presence and absence of physicality as a discipline which

studies humans through things to understand humans they must also address the performances as well as temporal and affective impacts of these material remains The contributions in this volume investigate the way time performance and movement both physically and emotionally are central aspects of understanding architectural assemblages It is a book about the constellations of people places and things that emerge and dissolve as affective mobile performative and temporal engagements This volume juxtaposes archaeological research with perspectives from anthropology architecture cultural geography and philosophy in order to explore the kaleidoscopic intersections of elements coming together in architecture Documenting the ephemeral relational and emotional meeting points with a category of material objects that have defined much research into what it means to be human Elements of Architecture elucidates and expands upon a crucial body of evidence which allows us to explore the lives and interactions of past societies
