*Ethics, Culture, and Psychiatry* Ahmed Okasha, Julio Arboleda-Florez, Norman Sartorius, 2008-11-01 Ethics Culture and Psychiatry International Perspectives is a textbook that explores the best ways to promote the use of the Declaration of Madrid which outlines ethical standards for psychiatric practice throughout the world The book is written with two questions in mind both easy to pose and difficult to answer Is it possible to formulate a set of principles that will be valid for all psychiatrists regardless of the cultures to which they belong or in which they live and practice or are there as many sets of ethical principles as there are cultures If there is such a set of principles what should we do to ensure that psychiatry as a discipline makes a significant contribution to societal good without helping the evil To facilitate the exploration of this territory 15 experts from a variety of cultures examine the most pressing ethical issues prevalent within the current practice of psychiatry Many of the dilemmas probed in this book are routinely encountered by clinicians who work in increasingly multicultural societies The text covers issues that are broadly

relevant to clinical practice and research including An overview of ethics and societies around the world Discussions of ethical practices and dilemmas specific to various cultural regions Transcultural debate on overarching issues such as incompetent patients informed consent and mental health law reform The complete copy of The Declaration of Madrid printed in the appendix Readers will find that this is a textbook that stimulates and supports rather than closes the debate on ethical aspects of professional psychiatric behavior Ethics Culture and Psychiatry International Perspectives is much more than just a book on ethics it is a major contribution to understanding the impact of culture and history on the ethical practice of medicine around the world and a continuous search for a consensus on how to live together and make contributions to the well being of people with mental illness their families and the family of humans on our planet
