Fractal Geometry and Number Theory Michel L. Lapidus, Michel Laurent Lapidus, Machiel van Frankenhuysen, 2000 A fractal drum is a bounded open subset of \mathbb{R}^m with a fractal boundary A difficult problem is to describe the relationship between the shape geometry of the drum and its sound its spectrum In this book we restrict ourselves to the one dimensional case of fractal strings and their higher dimensional analogues fractal sprays We develop a theory of complex dimensions of a fractal string and we study how these complex dimensions relate the geometry with the spectrum of the fractal string We refer the reader to Berrl 2 Lapl 4 LapPol 3 LapMal 2 HeLapl 2 and the references therein for further physical and mathematical motivations of this work Also see in particular Sections 7 1 10 3 and 10 4 along with Appendix B In Chapter 1 we introduce the basic object of our research fractal strings see Lapl 3 LapPol 3 LapMal 2 HeLapl 2 A standard fractal string is a bounded open subset of the real line Such a set is a disjoint union of open intervals the lengths of which form a sequence which we assume to be infinite Important information about the geometry of c is contained in its geometric zeta function $\zeta_c(s)$ Introduction We assume throughout that this function has a suitable meromorphic extension The central notion of this book the complex dimensions of a fractal string c is defined as the poles of the meromorphic extension of $\zeta_c(s)$

The Architecture of Law Brian M. McCall,2018-05-30 This book argues that classical natural law jurisprudence provides a superior answer to the questions What is law and How should law be made rather than those provided by legal positivism and new natural law theories What is law How should law be made Using St Thomas Aquinas s analogy of God as an architect Brian McCall argues that classical natural law jurisprudence provides an answer to these questions far superior to those provided by legal positivism or the new natural law theories The Architecture of Law explores the metaphor of law as an architectural building project with eternal law as the foundation natural law as the frame divine law as the guidance provided by the architect and human law as the provider of the defining details and ornamentation Classical jurisprudence is presented as a synthesis of the work of the greatest minds of antiquity and the medieval period including Cicero Aristotle Gratian Augustine and Aquinas the significant texts of each receive detailed exposition in these pages Along with McCall s development of the architectural image he raises a question that becomes a running theme throughout the book To what extent does one need to know God to

accept and understand natural law jurisprudence given its foundational premise that all authority comes from God The separation of the study of law from knowledge of theology and morality McCall argues only results in the impoverishment of our understanding of law He concludes that they must be reunited in order for jurisprudence to flourish This book will appeal to academics students in law philosophy and theology and to all those interested in legal or political philosophy
