Exploratory Image Databases Content Based Retrieval:

Exploratory Image Databases Simone Santini,2001 A new approach to image databases the work is divided into four central parts introduction to the problems that image database research must solve computer vision and information retrieval techniques image database issues and interface and engines for visual searches Example Imagine the difficulty of building and using a database for face recognition where an image of a face is used In order to effectively use the image a huge number of characteristics would need to be entered in the database The goal of future image databases is to use hardware and software to recognize and categorize images without typing in characteristics Comprehensive coverage of the image analysis as well as the database theoretical aspects of image databases Extensive coverage of interfaces and interaction models with a theoretical framework for the development of new interaction schemes Database Systems for Advanced Applications Weiyi Meng,Ling Feng,Stephane Bressan,Werner Winiwarter,Wei Song,2013-04-17 This two volume set LNCS 7825 and LNCS 7826 constitutes the refereed proceedings of the 18th International Conference on Database Systems for Advanced Applications DASFAA 2013 held in Wuhan China in April 2013 The 51 revised full papers and 10 short papers presented together with 2 invited keynote talks 1 invited paper 3 industrial papers 9 demo presentations 4 tutorials and 1 panel paper were carefully reviewed and selected from a total of 227 submissions The topics covered in part 1 are social networks query processing nearest neighbor search index query analysis XML data management privacy protection and uncertain data management and in part 2 graph data management physical design knowledge management temporal data management social networks query processing data mining applications and database applications *Frontiers of Remote Sensing Information Processing* Chi-hau Chen,2003 This book covers the frontiers of remote sensors especially with effective algorithms for signal image processing and pattern recognition with remote sensing data Sensor and data fusion issues SAR images hyperspectral images and related special topics are also examined Techniques making use of neural networks wavelet transforms and knowledge based systems are emphasized A special set of three chapters is devoted to seismic analysis and discrimination *Computational Intelligence in Medical Imaging* G. Schaefer,A. Hassanien,J. Jiang,2009-03-24 CI Techniques Algorithms for a Variety of Medical Imaging Situations Documents recent advances and stimulates further researchA compilation of the latest trends in the field Computational Intelligence in Medical Imaging Techniques and Applications explores how intelligent computing can bring enormous benefit to existing technology in medical **Exploration of Visual Data** Sean Xiang Zhou,Yong Rui,Thomas S. Huang,2012-12-06 Exploration of Visual Data presents latest research efforts in the area of content based exploration of image and video data The main objective is to bridge the semantic gap between high level concepts in the human mind and low level features extractable by the machines The two key issues emphasized are content awareness and user in the loop The authors provide a comprehensive review on algorithms for visual feature extraction based on color texture shape and structure and techniques for incorporating such

information to aid browsing exploration search and streaming of image and video data They also discuss issues related to the mixed use of textual and low level visual features to facilitate more effective access of multimedia data Exploration of Visual Data provides state of the art materials on the topics of content based description of visual data content based low bitrate video streaming and latest asymmetric and nonlinear relevance feedback algorithms which to date are unpublished
