Can the Finance-Growth-Nexus Bridge the Link Between Financial Integration and Economic Growth? Andreas Grün, 2011-09 Seminar paper from the year 2008 in the subject Business economics Investment and Finance grade 1 0 Otto Beisheim School of Management Vallendar course Seminar in International Finance language English abstract With this paper we intend to contribute to the research that investigates the usefulness of economic policies with regard to financial integration that may stimulate economic growth After giving a general overview using a self developed framework a more detailed perspective focuses on the crucial link between financial sector development and economic

growth that is generally referred to as growth nexus After this literature review we conduct our own empirical research that consists of three components Measuring association correlation measuring causality and measuring economic significance We find that financial development and economic growth are related and that for certain countries the assumption of causality that runs from financial sector integration to economic growth may be justified Via panel analysis the estimated OLS panel regression shows that a change in the degree of financial depth increases the overall per capita GDP of the OECD countries that are included in the panel So the hypothesis that financial integration stimulates economic growth cannot be falsified We are unable to break the link between financial development and economic growth There is no doubt that the numerous open questions with regard to this complex matter will cause a lot of additional research in this field of study in the next years We are excited to see the results

Financial Integration and Economic Growth in Europe Guglielmo Maria Caporale, Anamaria Diana Sova, Robert Sova, 2023. This study examines the impact of financial integration on economic growth in the case of 31 European countries over the period from 2000 to 2021 using dynamic panel data models. The estimation results provide evidence of significant positive effects of financial integration on economic growth. They also suggest that the financial integration-economic growth relationship depends on country-specific characteristics such as the level of financial development and the quality of institutions. More precisely, financial integration appears to exert a greater positive influence on growth in the case of the European countries with a higher level of financial development and better institutions.
