Financing Terrorism:

Financing Terrorism Michael Freeman, 2016-04-15 Without money terrorists cannot function as organizations and cannot conduct attacks Yet the questions remain how vulnerable are terrorists to financial disruptions Can governments put pressure on their finances in meaningful ways or are they too resilient and adaptive to be affected by state actions These and other questions about terrorism financing are vigorously debated by scholars and policymakers particularly since the attacks of September 11th 2001 While there is a growing literature on policy issues strategies and countermeasures states must first understand their enemies before developing strategies to defeat them So instead of focusing on the state response this book asks a more foundational question How do different terrorist groups actually raise money What are their budgets What do their portfolios look like How have they changed over time What are the advantages and disadvantages of different sources of financing The book includes case studies of 11 different terrorist groups or sets of groups within a country It is clear that each group has a different portfolio tailored to their needs and their environment and this makes countering terrorist financing more challenging for the state This topical book will be required reading for all students and scholars interested in terrorism financing as well as those working in government agencies tasked with combating terrorist groups and their financial resources

Targeting Terrorist Financing Arabinda Acharya, 2009-09-11 This book examines the dynamics of terrorist financing including a discussion about the importance of money from both the terrorist and the counter terrorist perspective Targeting Terrorist Financing argues that it is not the institutions that have failed the war on terrorist financing rather it is the states that have failed the institutions The measures contemplated by the world community to interdict terrorists and their financial infrastructures are sufficient to debilitate the terrorists both militarily and financially However what has been increasingly lacking is political will among the states and this has overwhelmed the spirit of cooperation in this very critical front against terrorism This volume assesses the need for international cooperation and the role of institutions and regimes in targeting terrorist financing After the 9 11 attacks there was an expression of global willingness to target terrorism generally and terrorist financing in particular The institutional mechanisms that grew out of this are explored in detail here with a critical examination of the progress made by the international community The impact of these measures is considered with respect to changes in the nature of the terrorist threat money confiscated adoption of international conventions and global standards by states and levels of compliance among others This book will be of great interest to students of terrorism international organisations international security and IR in general Arabinda Acharya is Research Fellow Manager of Strategic Projects and Head of the Terrorist Financing Response Project at the International Centre for Political Violence and Terrorism Research in the S Rajaratnam School of International Studies Nanyang Technological University Singapore
