Olsen, 2021-01-26 This book provides a broad introduction to the scientific and psychological study of music exploring how music is processed by our brains affects us emotionally shapes our personal and cultural identities and can be used in therapeutic and educational contexts *Discussion of Cold Damage (Shang Han Lun)* Guohui Liu, 2015-11-21 A major new translation of the Chinese classic Shang Han Lun by scholar and medical doctor Guohui Liu makes this foundational text fully accessible to English speaking clinicians for the first time Extensive study and research underpins the translation the author s understanding of both classical and modern Chinese enables him to interpret fully the ancient work within the theory of Chinese medicine An extensive commentary explains the translation the difficulties with the text how it has been subsequently translated and expands on the theory laid out in the original text to reach an understanding that can be applied in the clinic for diagnosis and treatment The value of this classic text lies primarily in its establishment of a basic framework for differentiation and treatment but it also presents 112 formulas and 88 medicinal substances which are commonly applied in clinical work for various conditions In this edition the 112 formulas are fully explained in the context of the clinical experiences of well known ancient and modern doctors and they are also laid out in two appendices cross referenced to the text *Cognitive Lexicography* Carolin Ostermann, 2015-07-31 English lexicography and linguistics have always shared close ties yet the potential of cognitive linguistics for lexicography has only been hesitantly acknowledged in the literature This is what cognitive lexicography attempts to change by using insights gained in cognitive semantic research for the development of new dictionary features After a short survey of the history and practice of English monolingual learner lexicography as well as an outline of the relationship between linguistics and lexicography three new dictionary features are developed They cover three different cognitive semantic theories as well

as three different parts of the monolingual dictionary entry each time for a new set of lexemes Frame semantics conceptual metaphor theory as well as cognitive conceptions of polysemy are used to create a new example section for agentive nouns a new defining structure for emotion terms and a new microstructural arrangement for particle entries Dictionary analyses on all as well as user studies on two of the features complement these suggestions The monograph thus presents a new approach to lexicography that incorporates into its description of lexical items how humans perceive and conceptualise language
