Report of the United States Commissioner of Fisheries for the Fiscal Year ... with Appendixes United States. Bureau of Fisheries,1930 VLSI Specification, Verification and Synthesis Graham Birtwistle,P.A. Subrahmanyam,2012-12-06 VLSI Specification Verification and Synthesis Proceedings of a workshop held in Calgary from 12 16 January 1987 The collection of papers in this book represents some of the discussions and presentations at a workshop on hardware verification held in Calgary January 12 16 1987 The thrust of the workshop was to give the floor to a few leading researchers involved in the use of formal approaches to VLSI design and provide them ample time to develop not only their latest ideas but also the evolution of these ideas In contrast to simulation where the objective is to assist in detecting errors in system behavior in the case of some selected inputs the intent of hardware verification is to formally prove that a chip design meets a specification of its intended behavior for all acceptable inputs There are several important applications where formal verification of designs may be argued to be cost effective Examples include hardware components used in safety critical applications such as flight control industrial plants and medical life support systems such as pacemakers The problems are of such magnitude in certain defense applications that the UK Ministry of Defense feels it cannot rely on commercial chips and has embarked on a program of producing formally verified chips to its own specification Hospital civil aviation and transport boards in the UK will also use these chips A second application domain for verification is afforded by industry where specific chips may be used in high volume or be remotely placed **Utilizing Problem Structure in Planning** Jörg Hoffmann,2003-10-24 Planning is a crucial skill for any autonomous agent be it a physically embedded agent such as a robot or a purely simulated software agent For this reason planning as a central research area of artificial intelligence from its beginnings has gained even more attention and importance recently After giving a general introduction to AI planning the book describes and carefully evaluates the algorithmic techniques used in fast forward planning systems FF demonstrating their excellent performance in many wellknown benchmark domains In advance an original and detailed investigation identifies the main patterns of structure which cause the performance of FF categorizing planning domains in a taxonomy of different classes with respect to their aptitude for being solved by heuristic approaches such as FF As shown the majority of the planning benchmark domains lie in classes which are easy to solve *Programming Languages and Systems* Pierpaolo Degano,2003-03-14 Comparison is a powerful cognitive research tool in science since it does across studies to evaluate similarities and differences e g across taxa or diseases This book deals with comparative research on plant disease epidemics Comparisons are done in specifically designed experiments or with posterior analyses From the apparently unlimited diversity of epidemics of hundreds of diseases comparative epidemiology may eventually extract a number of basic types These findings are very important to crop protection Plant disease epidemiology being the ecological branch of plant pathology may also be of value to ecologists but also epidemiologists in the areas of animal or human diseases may find

interesting results applicable to their areas of research

Programming Language Implementation and Logic Programming Jan Małuszyński, Martin Wirsing, 1991-08-14 This volume contains the papers which have been accepted for presentation at the Third International Symposium on Programming Language Implementation and Logic Programming PLILP 91 held in Passau Germany August 26 28 1991 The aim of the symposium was to explore new declarative concepts methods and techniques relevant for the implementation of all kinds of programming languages whether algorithmic or declarative ones The intention was to gather researchers from the fields of algorithmic programming languages as well as logic functional and object oriented programming This volume contains the two invited talks given at the symposium by H Ait Kaci and D B MacQueen 32 selected papers and abstracts of several system demonstrations The proceedings of PLILP 88 and PLILP 90 are available as Lecture Notes in Computer Science Volumes 348 and 456
