This superb interdisciplinary work should find a place on the shelves of every public and academic library that has the least bit of interest in environment issues which should mean just about all. Booklist Starred Review: Where does the environment leave off and society begin? When expanding production and consumption drives greenhouse gas emissions that warm the planet which in turn influence the conditions of economic expansion it is unclear where the climate ends and the economy begins. This fact is not new to our era however our social and natural sciences have only recently come to grips with the incredible complexity of the world described by understanding the environment and society as being of a piece. As a result in the last decade there has been an unprecedented explosion of new concepts, theories, facts and techniques that follow from such an understanding. The Encyclopedia of Environment and Society brings together multiplying issues, concepts, theories, examples, problems and policies with the goal of clearly explicating an emerging way of thinking about people and nature. With more than 1200 entries written by experts from incredibly diverse fields this innovative resource is a first step toward diving into the deep pool of emerging knowledge. The five volumes of this Encyclopedia represent more than a catalogue of terms. Rather they capture the spirit of the moment, a fascinating time when global warming and genetic engineering represent only two of the most obvious examples of socio environmental issues. Key Features: Examines many new ideas about how the world works, what creates the daunting problems of our time and how such issues might be addressed, whether by regulation, markets or new ethics. Demonstrates how theories of environmental management based on market efficiency may not be easily reconciled with those that focus on population and both may certainly diverge from those centering on ethics, justice or labor. Offers contributions from experts in their fields of specialty including geographers.
