Conventional Gestures Richard L Epstein,Alex Raffi,2018-11-05 Conventional gestures are those movements we make such as waving hello and shaking hands that are part of a learned shared symbolic system In this book Richard L Epstein working with the illustrator Alex Raffi examines how such gestures mean and how we can study them Drawing on their collection of over 400 American gestures available on the Advanced Reasoning Forum website they examine problems of methodology and the nature of gestures in relation to the work of others who have studied and collected gestures from various cultures An extensive annotated bibliography describes and comments on virtually all known collections of conventional gestures **Gesture and Understanding** Adam Kendon,1994-10 This special issue addresses the question of whether and how recipients of the various utterances of others are affected in their understanding by the gestures that often occur as part and parcel of the verbal comments The articles collected here review previous work on this question including

not only a consideration of the experimental work but also some of the observational studies that have appeared in recent years in which detailed descriptions of turn taking sequences in conversation are reported After reviewing the theoretical and methodological background the contributors argue for a functional approach to the study of gesture noting that gestures may have several different functions simultaneously Other material presented reports on an experimental attempt to test whether the understandings by observers of a speaker are affected by the speaker's gestures and exemplifies detailed context analyses of gesture occurrence in interaction
