Hall-Wallace, Michelle K. Hall, 2003 The popularity of geographic information system GIS software as a tool in the social and physical sciences is growing rapidly These three modular investigation guides let even novice users tap the power of ArcView GIS to explore manipulate and analyze large data sets Carefully designed and class tested the guides emphasize the visualization analysis and multimedia integration capabilities inherent to GIS while minimizing the need to master a complex software package Exploring Water Resources make the nuts and bolts of using ArcView GIS transparent to your students By focusing on teaching with GIS rather than teaching about it you can incorporate GIS easily into homework discussions or lab sessions This flexible teaching resource motivates and enables your students to learn by doing as they use a full complement of GIS capabilities EXPLORING WATER RESOURCES GIS INVESTIGATIONS FOR THE EARTH SCIENCES complements any introductory course in meteorology oceanography physical geography natural hazards Earth sciences atmospheric science and Earth systems science The guide leads students through a set of exercises in which they are asked to explore analyze and then elaborate on the information extracted from a robust GIS dataset using ArcView the dominant GIS software tool in the school and college market The GIS information has been preprocessed into maps and legends and some ArcView procedures have been automated so students can focus on the science content Extensive classroom testing at both the college and high school levels shows that students have little difficulty using the ArcView data sets to perform the exercises      **Environment and Planning** ,1998 Journal of urban planning and design Publishes research in the application of formal methods methods models and theories to spatial problems involving the built environment and the spatial structure of cities and regions Includes the application of computers to planning and design in particular the use of shape grammars artificial intelligence and morphological methods to buildings and towns the use of multimedia and GIS in urban and regional planning and the development of ideas concerning the virtual city      Exploring Tropical Cyclones Michelle K. Hall, 2003 These modules are designed with step by step directions to let even novice users utilize the power of the ArcView GIS application to explore manipulate and analyze large data sets Each new copy contains a CD with unlimited access to the SAGUARO projects and data as well as a 120 day time locked dual platform version of the ArcView software Site license users of ArcGIS software can order the guides without the CD The manuals can be purchased alone bundled together and or bundled with The Changing Earth      **Exploring the Dynamic Earth** Michelle K.
