First Line Winter 2004:

Craftsmen of the Army Prince Philip, 2017-10-30 The Corps of Royal Electrical and Mechanical Engineers REME provides the Army's integral repair and recovery capability. Its soldiers are deployed at the front line and have to be capable of switching instantly from a technical role to fighting alongside those they support as their many awards for gallantry demonstrate. This is the third volume of REME's distinguished history, covering the period from post-Cold War drawdown to the end of UK combat operations in Afghanistan, during which time REME was continuously involved in operations. The narrative knits together personal accounts of front-line experiences with an explanation of the political and military background, with a particular focus on equipment support issues. It explains how REME operates and deals with broader issues related to the procurement and support of equipment and the changing organizations delivering these vital services, within which members of REME have frequently played key enabling roles. Literary Magazine Review, 2005 The Dynamics of Rhetorical Performances in Late Antiquity Alberto J. Quiroga Puertas, 2018-10-09 This book argues that narrations of rhetorical performances in late antique literature can be interpreted as a reflection of the ongoing debates of the time. Competition among cultural elites, strategies of self-presentation, and the making of religious orthodoxy often took the shape of narrations of rhetorical performances in which comments on the display of oratorical skills also incorporated moral and ethical judgments about the performer. Using texts from late antique authors, in particular Themistius, Synesius of Cyrene, and Libanius of Antioch, this book proposes that this type of narrative should be understood as a valuable way to decipher the cultural and religious landscape of the fourth century AD. The volume pays particular attention to narrations of deficient rhetorical deliveries, arguing that the accounts of flaws and mistakes in oratorical displays and rhetorical performances reveal how late antique literature echoed the concerns of the time. Criticisms of deficient deliveries in different speaking occasions, declamations, public speeches, oratorical agonies, school exercises, sermons, were often disguised as accusations of practising magic, heresy, or cultural apostasy. A close reading of the sources shows that these oratorical deficiencies hid struggles over religious, cultural, and political issues. Newsmakers, 2007 General Technical Report NE, 1980 **New Zealand Journal of Agricultural Research**, 2011 **Animation: A World History** Giannalberto Bendazzi, 2015-10-23 A continuation of 1994's groundbreaking Cartoons, Giannalberto Bendazzi's Animation: A World History is the largest, deepest, most comprehensive text of its kind, based on the idea that animation is an art form that deserves its own place in scholarship. Bendazzi delves beyond just Disney, offering readers glimpses into the animation of Russia, Africa, Latin America, and other often-neglected areas, and introducing over fifty previously undiscovered artists. Full of first-hand, never-before-investigated and elsewhere-unavailable information, Animation: A World History encompasses the history of animation production on every continent over the span of three centuries. Volume II delves into the decades following the Golden Age, an uncertain time when television series were overshadowing feature films, art was heavily influenced by the Cold War, and new technologies

began to emerge that threatened the traditional methods of animation Take part in the turmoil of the 1950s through 90s as American animation began to lose its momentum and the advent of television created a global interest in the art form With a wealth of new research hundreds of photographs and film stills and an easy to navigate organization this book is essential reading for all serious students of animation history Key Features Over 200 high quality head shots and film stills to add visual reference to your research Detailed information on hundreds of never before researched animators and films Coverage of animation from more than 90 countries and every major region of the world Chronological and geographical organization for quick access to the information you re looking for
