Wilkins, 1984 **Proceedings of First USA-USSR symposium on Fracture of Composite Materials** George C. Sih, Vitauts P. Tamusz, 1979-03-31 The current situation with regard to the use of high performance composites is one of seeking a reliable means of characterizing the fundamental properties and or behavior of composite materials The employment of such materials in vital structural applications require criteria as part of the materials selection and design procedures However the principal limitation of the many currently available procedures most of which were borrowed from the metal industry is its intrinsic restriction to single phase materials They cannot adequately account for the variations in the constituents or structure of the composite that can have a significant influence on its gross behavior Although a considerable amount of research has been conducted in the past with the objective of understanding composite
