

Goddess Of Death

William Smith

Goddess Of Death:

Goddess as Nature Paul Reid-Bowen,2016-04-15 Goddess as Nature makes a significant contribution to elucidating the meaning of a female and feminist deity at the beginning of the twenty first century Bridging the gap between the emergent religious discourse of theology discourse about the Goddess and a range of analytical concerns in the philosophy of religion the author argues that theology is not as incoherent as many of its critics claim By developing a close reading of the reality claims embedded within a range of theological texts one can discern an ecological and pantheistic concept of deity and reality that is metaphysically novel and in need of constructive philosophical theological and scholarly engagement Philosophical theology is in an age concerned with re conceiving nature in terms of agency chaos complexity ecological networks and organicism both an active possibility and a remarkably valuable academic feminist and religious endeavour
