Enzyme Engineering 7 Allen I. Laskin, George T. Tsao, Lemuel B. Wingard, 1984-01-01      **Enzyme Engineering** e.a, 1986

*Stability and Stabilization of Enzymes* W.J.J. van den Tweel, A. Harder, R.M. Buitelaar, 2013-10-22 These proceedings contain most of the oral presentations and posters of the international symposium on Stability and Stabilization of Enzymes held in Maastricht in November 1992 They provide a comprehensive overview of the state of the art in this field The possible applications of enzymes are enormous Years of development have seen many enzymes brought onto the market but they are still expensive to use Therefore their efficient application is a prerequisite for common usage One of the main factors for this efficiency is the stability of the enzymes The topics thus ranged from the extensive fundamental thermodynamic knowledge gathered in academic research to the practical applied knowledge built up in industry during the time that enzymes have been produced commercially The subject Stability and Stabilization of Enzymes was discussed from various points of view as was reflected in the themes of the symposium sessions In the session on Fundamentals of Enzyme Stabilisation the thermodynamic background of the phenomenon was highlighted In yet another session the recently developed analytical tools to measure enzyme stability and stabilisation were discussed Further sessions comprised the physical chemical and biological ways to obtain enzyme stabilisation and finally the industrial practice of enzyme stabilisation was treated by representatives of the world's most important enzyme producers The book will be of interest to researchers in universities and industry in the fields of biochemistry enzymology and biotechnology      **Comprehensive Chirality**, 2012-12-31

Although many books exist on the subject of chiral chemistry they only briefly cover chiral synthesis and analysis as a minor part of a larger work to date there are none that pull together the background information and latest advances in one comprehensive reference work *Comprehensive Chirality* provides a complete overview of the field and includes chiral research relevant to synthesis analytic chemistry catalysis and pharmaceuticals The individual chapters in each of the 9 volumes provide an in depth review and collection of references on definition technology applications and a guide links to the related literature Whether in an Academic or Corporate setting these chapters will form an invaluable resource for advanced students researchers new to an area and those who need further background or answers to a particular problem particularly in the development of drugs Chirality research today is a central theme in chemistry and biology and is growing in importance across a number of disciplinary boundaries These studies do not always share a unique identifying factor or subject themselves to clear and concise definitions This work unites the different areas of research and allows anyone working or researching in chiral chemistry to navigate through the most essential concepts with ease saving them time and vastly improving their understanding The field of chirality counts several journals that are directly and indirectly concerned with the field There is no reference work that encompasses the entire field and unites the different areas of research through deep foundational reviews *Comprehensive Chirality* fills this vacuum and can be considered the definitive work It will help

users apply context to the diverse journal literature offering and aid them in identifying areas for further research and or for solving problems Chief Editors Hisashi Yamamoto University of Chicago and Erick Carreira ETH Zurich have assembled an impressive world class team of Volume Editors and Contributing Authors Each chapter has been painstakingly reviewed and checked for consistent high quality The result is an authoritative overview which ties the literature together and provides the user with a reliable background information and citation resource Proceedings of 16th International Conference and Exhibition on Pharmaceutics & Novel Drug Delivery Systems 2018 ConferenceSeries, March 19 21 2018 Berlin Germany Key Topics Drug Targeting and Design Drug Delivery Technologies Nanoparticulate Drug Delivery Systems Pharmaceutical Nanotechnology Nanomedicine and Nanotechnology Smart Drug Delivery Systems Biomaterials in Drug Delivery Vaccine Drug Delivery Systems Medical Devices for Drug Delivery Peptides and Protein Drug Delivery Green Sustainable Pharma 2D 3D Printing in Drug Delivery Pre Formulation Formulation Aspects Pharmacokinetics and Pharmacodynamics in drugs Routes of Drug Delivery Nanotechnology in Drug Delivery Global Drug Delivery Policy Biomedicine and Pharmacotherapy
