Scientific Inquiry Cycle: Review

Science helps communities solve problems by applying knowledge and creating things that "solve" real-world issues such as water quality or waste management using science. Ideas or proposed solutions can have a positive impact on understanding the problem fully, including its causes and effects, as the first step in finding an effective resolution.

Designing solutions requires considering various constraints, such as budget, time, and safety concerns. Constraints represent some part of a problem that limits the options available, and it is important to weigh these trade-offs carefully. For example, creating materials for a house that may affect its cost and ease of use, cannot influence the effectiveness of the solution.

After identifying a solution, documenting how it works, what constraints affected it, and any compromises that have already been and possibly involve on the way. Communication, using digital media, and reflecting on the results of the scientific solution are important steps. This process can help sharing ideas locally encourages responsible decision-making and helps communities thrive.

6A. Mark the best answer for each question.

1. What is the first important step when working on how to solve a local problem?
- a. Designing a solution
 - b. Spreading the most expensive materials
 - c. Spreading safety concerns
 - d. Understanding the problem fully
2. What does documenting constraints in a solution help with?
- a. Finding the constraints of the solution
 - b. Evaluating the solution's cost and safety
 - c. Showing how to avoid constraints
 - d. Determining what the solution has no costs
3. Which is an example of a trade-off?
- a. Finding a solution with no cost
 - b. Finding a solution with no time
 - c. Finding a solution with no safety
 - d. Using unsafe materials
4. Why is communication important?
- a. To avoid not being in agreement
 - b. To make ideas shared
 - c. To finish the problem by comparing
 - d. To avoid discussing the work

6B. Mark if the statement is True (T) or False (F).

1. A solution made after one failed attempt is always better than the first one.

Answer for each question.

1. Is a solution made after one failed attempt always better than the first one?

2. Why must this be considered in designing a solution?

3. What might happen when creating a new idea?

4. How might science solutions be communicated?

5. Why are trade-offs essential in scientific understanding?
