*The Family* Elsie Worthington Clews Parsons,1906  
*Families in transition* Nickie Charles,Charlotte Davies,2008-07-30 This book addresses the complexity of family change It draws on evidence from two linked studies one carried out in the 1960s and the other in the early years of the 21st century to analyse the specific ways in which family lives have changed and how they have been affected by the major structural and cultural changes of the second half of the twentieth century The book shows that while there has undeniably been change there is a surprising degree of continuity in family practices It casts doubt on claims that families have been subject to a process of dramatic change and provides an alternative account which is based on careful analysis of empirical data The book presents a unique opportunity to chart the nature of social change in a particular locality over the last 50 years includes discussions of social and cultural variations in family life focusing on younger as well as older generations explores not only what happens within family households but also what happens within networks of kin across different households and shows the way changing patterns of employment affect kinship networks and how geographical mobility co exists with the maintenance of strong kinship ties The findings will be of interest to students of sociology social anthropology social policy women s studies gender studies and human geography at undergraduate and postgraduate level
