False Consciousness:

False Consciousness Guenter Lewy, 2017-07-05 In this book Guenter Lewy explains and critiques the idea of false consciousness that people living under capitalism do not know their best interests This idea was prevalent in the writings of nineteenth century Marxism modern communism and the New Left Lewy applies what German scholars call Ideologiekritik to the Marxian concept of ideology or false consciousness itself to demystify the concept of mystification He also presents an account of the historical development of the concept and the dangers of its application in society Belief in false consciousness inspired many social scientists to propose that elite classes in capitalist countries use the media and the education system to manipulate the proletariat thus perpetuating their own power Lewy marshals social scientific evidence to refute that idea demonstrating that education and the mass media in the United States in fact often challenge accepted values and the status quo Lewy documents Soviet and Chinese brainwashing efforts to eradicate dangerous political ideas and values derived from a belief in false consciousness He also reviews attempts by Marxist and neo Marxist educators and social scientists in the Federal Republic of Germany West Germany to free young people from false consciousness by means of emancipatory pedagogy a program of intense political indoctrination [False Consciousness and Ideology in Marxist Theory](#) Ron

Eyerman, 1981 **False Consciousness** Nika Deslauriers-Paquette, 2011 False consciousness was a concept originally developed by Marx and Engels in the 19th century to explain the actions and behaviors of the bourgeoisie In the 20th century various political thinkers such as Lukacs Marcuse and Jost broadened its definition to explain the actions and behaviors of all members of society including those from lower or subordinate classes False consciousness has since been used by some Marxian political thinkers and anti capitalist activists to make sense of people's quiescence towards the capitalist system This interpretation of the concept has attracted an array of critiques that have severely affected false consciousness legitimacy and value These critiques demonstrate that people's quiescence toward the capitalist system is not necessarily synonymous with false consciousness and it should not be used as an excuse for communism's failure Despite the severity of these critiques Augustinos disputes that false consciousness is not an outdated and useless concept but that it is necessary to redefine it in order to increase its credibility It must be situated not in people's mind but within the capitalist structure which presents itself as a superior version of what it truly is and sustains misconceptions about its real capacities and limitations This thesis is thus an implicit defense of the validity of the Marxian concept of false consciousness **A Companion to**

Ideology and False Consciousness Christopher L. Pines,1993-07-01 In this book Christopher Pines demonstrates that Karl Marx conceived of ideology as false consciousness He shows how the different meanings of false consciousness found in the writings of Marx and Engels reflect the influence of the views of the Baconian French Enlightenment and of Hegelian Feuerbachian philosophies Pines argues that for Marx the diverse senses of false consciousness all generally denote a social consciousness that takes certain false things to be true regarding matters of significance to class divided societies

Rescuing Autonomy from Kant James Furner,2023-01-23 In *Rescuing Autonomy from Kant* James Furner argues that Marxism's relation to Kant's ethics is not one of irrelevance complementarity or incompatibility but critique Although Kant's formulas of the categorical imperative presuppose a belief in God that Kant cannot motivate the value of autonomy can instead be grounded by appeal to an antinomy in capitalism's basic structure and this commits us to socialism

Cultural Software J. M. Balkin, 1998-01-01 In this book J M Balkin offers a strikingly original theory of cultural evolution a theory that explains shared understandings disagreement and diversity within cultures Drawing on many fields of study including anthropology evolutionary theory cognitive science linguistics sociology political theory philosophy social psychology and law the author explores how cultures grow and spread how shared understandings arise and how people of different cultures can understand and evaluate each other s views Cultural evolution occurs through the transmission of cultural information and know how cultural software in human minds Balkin says Individuals embody cultural software and spread it to others through communication and social learning Ideology the author contends is neither a special nor a pathological form of thought but an ordinary product of the evolution of cultural software Because cultural understanding is a patchwork of older imperfect tools that are continually adapted to solve new problems human understanding is partly adequate and partly inadequate to the pursuit of justice Balkin presents numerous examples that illuminate the sources of ideological effects and their contributions to injustice He also enters the current debate over multiculturalism applying his theory to problems of mutual understanding between people who hold different worldviews He argues that cultural understanding presupposes transcendent ideals and shows how both ideological analysis of others and ideological self criticism are possible

False Consciousness Denise Meyerson, 1991 This book is a contribution both to analytical philosophy of mind and to Marxist philosophy Marxists see pervasive irrationality in the conduct of human affairs and claim that people in a class divided society are prone to a variety of misconceptions They say that we can suffer from false consciousness in our views about what inspires our behavior and in our judgments as to what is good for us Meyerson uses the techniques of analytic philosophy to investigate this picture and argues that Marxism is committed to the idea of motivated belief and that the idea is philosophically defensible She shows that there are other philosophically defensible claims which are congenial to Marxism that there are facts about interests that interests are not based on wants that a desire can be contaminated by its history that our judgments about our interests do not automatically motivate us and that beliefs can survive the evidence that they are

Huaco,1999-10-27 Provocative in content this book is the only one of its kind to evaluate Marx s work in light of recent theories in sociobiology Huaco identifies several dynamic aspects of Marx s socio cultural model and uses current research concerning the genetic basis of certain human behaviors to determine their validity Specifically he examines issues surrounding ownership relations surplus transfer and economic exploitation class struggle and the development of high culture In addition to arguing that innovation and competition are necessary to prevent a stagnant economy Huaco contends that stopping surplus transfer will not eliminate poverty as Marx maintained Instead of retaining surplus society can develop ways to recover surplus that will put an end to poverty and the social problems that stem from it Sociologists and other scholars interested in socio economic theory will find this thought provoking work stimulating
