The Foundations of Economics Walter Eucken, 2012-12-06 THE FIRST GERMAN edition of this book appeared in 1940 Since then the book has gone through five more editions and has been translated into Spanish and Italian The present English translation is based on the sixth German edition The author was Professor of Economics at the University of Freiburg Germany Professor Eucken was a student at a time when the Historical School dominated the teaching of economics at the German universities Although at the beginning of his career he did some work along the lines of the

Historical School neither the aims nor the methods of historical research the field of economics as practised by the representatives in of the Historical School satisfied him and the fact that the members of this school were unable to explain the causes of economic events such as the German inflation after World War I was an added reason for him to turn to economic theory He became among German economists the foremost opponent of the Historical School which he criticised in several publications Through his writings and his teaching he contributed his share to the revival of interest in economic theory which was noticeable in the twenties And he was one of the few economists left in Germany who helped to keep this interest alive during the thirties and during World War II During this time he published *Kapitaltheoretische Untersuchungen* 1936 and the present volume which immediately gave rise to an extensive discussion in German economic journals *The Cultural Foundations of Economic Development* Emily Chamlee-Wright, 2002-11 This book argues that international aid programmes are unsuccessful for indigenous African institutions because it is based on mainstream economic theory which is fundamentally acultural which does not understand their cultural context *Some Foundations of Economic Development in the Upper East Tennessee Valley, 1850-1900* William Hord Nicholls, 1956 *Ownership Economics* Gunnar Heinsohn, Otto Steiger, 2013 This book presents the first full length explanation in English of Heinsohn and Steiger's groundbreaking theory of money and interest which emphasizes the role played by private property rights Ownership economics gives an alternative explanation of money and interest proposing that operations enabled by property lead to interest and money rather than exchange of goods Like any other approach it has to answer economic theory's core question what is the loss that has to be compensated by interest Ownership economics accepts neither a temporary loss of goods as in neoclassical economics nor Keynes's temporary loss of already existing exogenous money as the cause of interest Rather money is created as a non physical title to property in a credit contract secured by a debtor's collateral and the creditor's net worth This book is an edited English translation of a highly successful German text and offers the first book length treatment of a theory which has received much interest since its first appearance in articles in the late 1970s **The Economic Foundations of Society** Achille Loria, 1907 *The Institutional Foundations of East Asian Economic Development* Y. Hayami, M. Aoki, 1998-12-13 The International Economic Association was foremost in reviving professional economists' concern with institutions and their impact in publications such as *Economic Institutions in a Dynamic Society* 1989 This volume concentrates on the states whose development has been characterised as the East Asian miracle in the light of the performance of other economies starting from similarly low income levels including India China African states especially Nigeria and Latin American countries including Brazil This comprehensive comparative survey in economic history demonstrates the external shocks and interacting domestic forces which constituted the growth dynamic Nobel Laureates Kenneth Arrow and Douglass North and past President of the IEA the late Michael Bruno are among the thirty four highly distinguished specialist contributors *Renewing Cities* Ross J. Gittell, 2014-07-14 The cities of Lowell and New Bedford in Massachusetts Jamestown in New

York and McKeesport in Pennsylvania have all undergone years of adversity and decline their economic bases having been badly damaged by structural changes in the national economy particularly in the manufacturing sector In situations like these can local development efforts make a difference Ross Gittel answers in the affirmative This interdisciplinary work focuses on comparative case studies of the four cities The book reveals how public private and community based local economic development initiatives affect local economic performance what works and what does not work City leaders and institutions can help reorganize and reshuffle local resources with results that include increased investment greater effort by local individuals and institutions more cooperation among different development interests and improvement in city economic positioning relative to the regional economy and local development cycles Gittel emphasizes the possibility of shifting from a zero sum game attracting jobs from elsewhere toward the goal of converting underutilized local resources to higher value uses through alternative forms of economic and political organization Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *Understanding the Local Economy* W. William Kapp, 2012-05-23 This is a ground breaking book about the foundations of institutional economics K

William Kapp presents the economic role of institutions for economic development capital formation and technological dynamics in an easily accessible and comprehensive manner As a front rank 20th century institutional economist Kapp pulls together arguments from a variety of sources including Thorstein Veblen John Kenneth Galbraith and Gunnar Myrdal all of which emphasize the crucial role of institutions The author cements institutional economics as a distinct and coherent framework of analysis to effectively address urgent socio economic problems such as environmental disruption and sustainable development This book begins with a critique of conventional neoclassical economics and an overview of the antecedents of institutional economics The core of the book is formed by the chapters on institutions human economic behavior and needs arguing that institutional change is key to directing economic development towards sustainable and adequate living conditions rather than merely formal growth formulas The final chapters provide the reader with the institutional theories of capital and technology showing how capital formation and technological dynamics are determined by institutions such as the principle of investment for profit The appendix complements Kapp s plea for institutional change with articles on science and technology social costs substantive economics and circular and cumulative causation This book is suited for readers at all levels who are interested in institutional economics the history of economics thought political economics as well as ecological and heterodox economics Researchers and students will find it to be an easily accessible and a concise elaboration on the foundations of institutional economics
