Formalized Recursive Functionals And Formalized Realizability:

Formalized Recursive Functionals and Formalized Realizability Stephen Cole Kleene, 1969 This monograph carries out the program which the author formulated in earlier work the formalization of the theory of recursive functions of type 0 and 1 and of the theory of realizability [Formalized recursive functionals and formalized realizability](#) S.C. Kleene, 1969

[Handbook of Mathematical Logic](#) J. Barwise, 1982-03-01 The handbook is divided into four parts model theory set theory recursion theory and proof theory Each of the four parts begins with a short guide to the chapters that follow Each chapter is written for non specialists in the field in question Mathematicians will find that this book provides them with a unique opportunity to apprise themselves of developments in areas other than their own *Constructivism in Mathematics, Vol 1* A.S. Troelstra, D. van Dalen, 1988-07-01 These two volumes cover the principal approaches to constructivism in mathematics They present a thorough up to date introduction to the metamathematics of constructive mathematics paying special attention to Intuitionism Markov s constructivism and Martin Lof s type theory with its operational semantics A detailed exposition of the basic features of constructive mathematics with illustrations from analysis algebra and topology is provided with due attention to the metamathematical aspects Volume 1 is a self contained introduction to the practice and foundations of constructivism and does not require specialized knowledge beyond basic mathematical logic Volume 2 contains mainly advanced topics of a proof theoretical and semantical nature [Cambridge Summer School in Mathematical Logic](#) A. R. D. Mathias, H. Rogers, 2006-11-15 [Logic Colloquium 2000](#) René Cori, Alexander Razborov, Stevo Todorčević, Carol Wood, 2017-03-30 Since their inception the Perspectives in Logic and Lecture Notes in Logic series have published seminal works by leading logicians Many of the original books in the series have been unavailable for years but they are now in print once again This volume the nineteenth publication in the Lecture Notes in Logic series collects the proceedings of the European Summer Meeting of the Association for Symbolic Logic held in Paris France in July 2000 This meeting marked the centennial anniversary of Hilbert s famous lecture and was held in the same hall at La Sorbonne where Hilbert presented his problems Three long articles based on tutorials given at the meeting present accessible expositions of developing research in model theory computability and set theory The eleven subsequent papers present work from the research frontier in all areas of mathematical logic [Handbook of Proof Theory](#) S.R. Buss, 1998-07-09 This volume contains articles covering a broad spectrum of proof theory with an emphasis on its mathematical aspects The articles should not only be interesting to specialists of proof theory but should also be accessible to a diverse audience including logicians mathematicians computer scientists and philosophers Many of the central topics of proof theory have been included in a self contained expository of articles covered in great detail and depth The chapters are arranged so that the two introductory articles come first these are then followed by articles from core classical areas of proof theory the handbook concludes with articles that deal with topics closely related to computer science [Metamathematical Investigation of Intuitionistic Arithmetic and Analysis](#) Anne S.
