Barry Miller

Fullness Of Being:

The Fullness of Being Barry Miller, 2002 According to a fairly standard view there are several reasons for denying that existence is a real property of individuals One is that exists cannot be predicated of individuals and another is that first level properties are parasitic on individuals for their actuality which is something that existence could never be A third is that existence adds nothing to individuals Moreover even if existence were to survive all three counter indications it would be merely the most vacuous of properties The Fullness of Being however argues that this view of existence is seriously awry In this brilliant book Barry Miller argues that existence is not merely a real property of individuals but by far the richest of their properties The commonly accepted view of existence is testimony contends Miller to what happens when wrong questions are asked false assumptions are made and the possibility of a new paradigm for existence is dismissed without consideration They bear witness to the substantial flaws underlying the familiar claim existence is not a predicate and the Frege Russell Quine view not only of exists as exclusively a second level predicate but of existence as no more than a Cambridge property of individuals By way of contrast The Fullness of Being is an account of what happens when different questions are asked when false assumptions are eschewed and when the possibility of a radically different paradigm for existence is actively explored rather than completely ignored What began for Miller as an exercise in philosophical logic to determine whether exists is predicable of individuals ends in an argument with groundbreaking consequences for ontology The Fullness of Being is a brilliant and original account of existence It will be required reading for those philosophers interested in the topic Peter Forrest professor of philosophy University of New England Australia *Basic Writings of Saint Thomas Aquinas ... God as Otherwise Than Being Calvin O. Schrag, 2002 Speaking as one of the founders of American Continental philosophy Calvin O Schrag offers an exceptionally clear balanced and informative discussion of a complex questions vexing postmodern currents of philosophical and theological reflection Does the death of the god conceived as a highest being in Western and especially modern traditions open a new space within which to rethink God in terms of a gift or giving that would stand beyond the usual spate of metaphysical categories Schrag draws with grace ease and precision upon the history of Western metaphysics from Plato and Aristotle through Nietzsche and Heidegger Most important to his central question of God as otherwise than Being however are such influential post Heideggerian thinkers as Jean Luc Marion Jacques Derrida and Emmanuel Levinas Schrag s inquiry engages these thinkers at a serious level and also expands recent discussions by relating them to the work of figures hitherto overlooked or underplayed most notably Paul Tillich
