

How To Write Good AI Prompts

Give your AI an identity

Tell your AI who it is. If your AI prompts are about tennis, for example, start by saying something like "You're Serena Williams," and then ask, "Help me come up with a writing prompt about tennis for 3-year-olds." Some other examples might be "You're a NASA astronomer. Help me come up with three questions for my sixth-grade students about the planet Mars," or "You're Mark Cuban. What's a good prompt to get high schoolers to write about their career aspirations?"

Be very specific

You don't want to leave the AI too guessing, because it will probably fill in the wrong blanks. Instead, get as specific as possible about the topic, grade or difficulty level, and any other important details that should be included in the tool's response.

Incorporate educational objectives

Are you trying to meet certain curriculum-based learning objectives? If so, be sure to include those in your directions for generating AI prompts.

Define the audience

Be clear about who the AI prompt is for. Are you writing for 2nd-grade parents or 10th-grade AP U.S. history students? Tailor your prompts to suit the specific audience to ensure relevance and engagement.

Use open-ended questions

The goal is to allow for creative and open-ended responses to encourage problem-solving and creativity among your students.

Encourage critical thinking

Consider ways to generate AI prompts that promote critical thinking.

Define the output

Specify what you want the AI to generate. Whether it's a list of 20 writing prompts, a worksheet with 10 true-or-false questions, or a short letter with an introduction, two body paragraphs, and a conclusion, being clear about the desired output helps the AI deliver more accurate results.

Give feedback to refine the output

Interact with the AI the way you would with a student on an assignment. Provide feedback if you need more or different information. This helps refine the AI's responses and improves the quality of the output over time.
